CURIE LEARNING
learning with the leader ...

2027 Winter Course Schedule

For us, education is not just a business.
It is a passion and commitment to guide & support students to reach their optimum potential.

Curie Learning programs are designed for academically inclined students who need a challenge in their education. Strong foundations in Math and English during Elementary & Middle School will help in maintaining ongoing success in the future. In our **Twenty** years of serving the region, we have guided and supported countless students in reaching their optimum potential as we've worked to offer the best Elementary, Middle and High School Math and English programs.

Curie Learning is the most successful Learning center in Northern Virginia for helping students with TJ & ACL (AOS/AET) Admissions.

161 Curie students have been accepted so far for the 2026 freshman (class of 2030) of TJACL (AOS/AET)
and
153 Curie students are currently on the waitlist; some of them will be accepted before August 2026.

SAT/ACT Test Prep Coaching, College Counseling, & many more HS courses (including AP Courses) are offered.

CURIE LEARNING
learning with the leader ...

6th Grade MAP/SOL Prep Classes

Advanced 6th Grade Students

This ONLINE course is highly recommended for any current Curie Learning student who is taking **Math 7** this year in day school.
For this course, we focus on the topics that students are more likely to miss on the SOL and also on the topics not covered in our regular Level 6 course.

OPTION 1: FALL	**OPTION 2: SPRING**
MAP & iReady & SOL Test Preparation	**SOL Test Preparation**
Tuesdays from 7:30pm - 9pm	**Tuesdays from 7:30pm - 9pm**
4 SOL Test Practice Sessions: 4/6 - 4/27	4 SOL Test Practice Sessions: 4/6 - 4/27
ONLINE ONLY	**ONLINE ONLY**

$150 ***(Current Curie Students)*** **$500** ***(New Students)***

This course prepares students for the following tests:

1) **MAP Math Testing:** The MAP (or Measure of Academic Progress) tests are used for both Fairfax and Loudoun counties to determine middle school placement the following year. There are three tests that students will take during the academic year, near the beginning, middle, and end. Since the MAP is designed to test progress, it does not necessarily coincide with what your child has already learned already during the school year; there may be topics on the test that students are not necessarily expected to know yet. Also, the MAP test is a computer-adaptive assessment, meaning questions become more difficult as a student answers correctly, and they become easier if a student answers incorrectly. The sooner we can cover these topics for your child, the better they can score on these tests. This course will help to prepare your child ahead of time and for higher-level problems. Test will be conducted throughout the school year–near the beginning, middle, and end of the academic year.

2) **iReady Math Testing:** FCPS has stated that they will also be using the iReady Math testing to determine middle school placement. The iReady Math test is also an adaptive assessment, or a type of computer adaptive test in that it matches the difficulty of test questions to the ability of each student. As students answer questions correctly, the test becomes more difficult as it progresses. As students answer questions incorrectly, the test gets easier.

3) **SOL Math Test:** All students in the state of Virginia will be taking the Standards of Learning state standardized test. The SOL is heavily considered when determining advanced placement for middle school.
***Note:** FCPS is no longer implementing the IAAT (IOWA) test for Algebra 1 placement. Instead, FCPS will use the results from the MAP testing as well as the iReady Math test.

High School Courses

SAT/ACT Test Prep (Grades 10-12)
PSAT Test Prep (Grades 8-9)

SAT/ACT: This **6-Month course** is intended to prepare students for taking both math and English Part of the SAT/ PSAT /ACT test. Students in 11th or 12th grade who will be taking or retaking these standardized tests at the end of August or later are encouraged to join. Students preparing for the PSAT are also welcome to join, as the topics tested for the SAT and PSAT are mostly identical.

PSAT: This **6-Month course** also can serve students who want to apply in the 10th grade for 11th grade admission at AET or in the 9th grade for 10th grade admission at MATA.

** MATH PREREQUISITE: Any full Algebra 1 and Geometry course given through day school or through Curie Learning.*

*****Only English or Math (Every Other Sunday) for just $995!***

☞ CLICK HERE FOR THE SAT/PSAT/ACT ENROLLMENT FORM

Algebra I

- The curriculum of this class will include that of Algebra 1, a high school credit course. This class is intended for students who are in advanced math now in school, who are on track to take Algebra I in their current or following year in their day schools, and/or who plan to appear for TJ/AOS/AET entrance exams in their 8th grade. Whether students are taking Algebra 1 as a seventh, eighth, or ninth grader in their day schools, our program will help prepare students for this high school-credit math class (which affects their high school GPA). This course give the students a head start with the Algebra 1 concepts, also helping them to transition into an advanced high school level course by expecting a certain degree of rigor and independent learning skills. Also, gaining a thorough understanding of Algebra 1 concepts is necessary for scoring well on the SAT/ACT. Many colleges and universities are again requiring these scores for student application. It is difficult to handle Algebra 2, Precalculus and other higher level courses without a solid foundation in Algebra1.

$280/month

Payment will be collected as one time payment

Feb. 2, 2027 – June. 11, 2027

Tentative: Availability will be based on enrollment numbers.

learning with the leader ...

High School Geometry

By Ms. Nora Tran

◊ The curriculum of this class will include that of Geometry, a high school credit course. This class is intended for students who are on track to take Geometry in their current or following year in their day schools. Geometry is the class that follows Algebra 1 the previous year. Whether students are taking Geometry as a middle school or high school student, our program will help prepare them for this high school-credit math class (which affects their high school GPA). Not only will we give the students a head start with the concepts taught in any Geometry course, we will help them to transition into an advanced Geometry course by expecting a certain degree of rigor and independent learning skills. Also, gaining a thorough understanding of Geometry concepts is necessary for scoring well on the SAT/ACT later on; many colleges and universities are again requiring these scores for student application.

☞ CLICK HERE FOR THE GEOMETRY ENROLLMENT FORM

Algebra II

By Ms. Ruchi Saxena

This class is intended for students who will be taking Algebra 2 in the coming academic school year or planning to take Algebra 2 as their next class in school (next year or semester).

In the day schools, the progression of math courses is the following order: first Algebra 1, then Geometry, then Algebra 2 (or Algebra 2/Trigonometry). Algebra 2 is a course required for a high school diploma and which most students take as 8th, 9th, 10th or 11th graders (depending upon their level).

Our program will help prepare students for this high-school-credit math class (which affects their high school GPA). Not only will we give the students a head-start with the concepts taught in any Algebra 2 course, we will help them to transition into an advanced Algebra 2 course by expecting a certain degree of rigor and independent learning skills.

Also, gaining a thorough understanding of Algebra 2 concepts is necessary for scoring well on the SAT/ACT later on; many colleges and universities are again requiring these scores for student application. If a student is joining the AET Freshman course for the upcoming school year, it is recommended that the student register for our Algebra 2 course. This is the material that will best prepare students for the AET Freshman Math program.

AP Precalculus
AB & BC/Precalculus/TJ Math 4
By Dr. Rao Mulpuri

◊ This course gives the students a head start with the concepts taught in Precalculus course, and helps them gain a thorough understanding of Pre-Calculus concepts necessary for success in higher level math courses like AP Calculus AB/BC.

Students who are currently enrolled in Precalculus or Algebra 2 in school can take this course. Our program will help prepare students for this high-school-credit math class (which affects their high school GPA). Not only will we give the students a head start with the concepts taught in any Pre-Calculus course, we will help them to transition into an advanced Pre-Calculus course by expecting a certain degree of rigor and independent learning skills.

Also, gaining a thorough understanding of Pre-Calculus concepts is necessary to prepare for higher level math courses like AP Calculus, Calculus AB/BC, and AP Statistics.

◊ Students can enroll in **Precalculus** after completing the **Algebra II** course

***Note: Precalculus BC includes all topics in Precalculus AB.*

$270/month
Math & English
Payment will be collected as one time payment

Feb. 7, 2027 – June. 13, 2027

Sundays 4:00 pm – 5:30 pm EST
Tentative: Availability will be based on enrollment numbers.

ONLINE

$1,350 ONE Time Fee!

The remaining topics will be covered in February and March for an additional fee of $300.

College & Career Counseling

For High School Students
(9th - 12th Graders)

An online individualized counseling program available to all high school students across the United States!

Click here for an information video

Upperclassman Counseling Packages (For 12th Graders)

The counselor will assist students with their college application materials, helping them stand out in a crowded field and successfully meet application deadlines.

Package Includes: 2 counseling sessions per month

Payment Options Include: ***[Effective from April 1, 2025]***

- ◊ Twelve-month package (24 sessions): $2800
- ◊ Eight-month package (16 sessions): $2000
- ◊ Four-month package (8 sessions): $1200

Upperclassman Counseling Packages (For 9th, 10th & 11th Graders)

Counselors will help students create an academic plan to prepare for their college and career goals. This may include finding work and service opportunities or choosing the right high school classes that will prepare for their desired college programs.

Package Includes: 1 counseling session per month

Payment Options Include:

- ◊ Twelve-month package (12 sessions): $1500
- ◊ Eight-month package (8 sessions): $1000

All-Inclusive Package (For 9th Graders only)

Package Includes:

- ◊ 1 counseling session a month for 40 months
- ◊ SAT/ACT Preparation class
- ◊ High School Writing Fundamentals and Writing for College and Career Preparation classes
- ◊ Up to 3 other semester-long high school level classes of your choice

College Prep All-Inclusive Package for Four Years (40 months): $12,000

College & Career Counseling

SEE PREVIOUS PAGE FOR MORE INFORMATION

All sessions will be held through **Zoom** on evenings or weekends. You may join the program at any time. However, your first appointment will be held the following month. (For example, if you join the program in mid-September, your first appointment will be in October.) You must register and pay by the 15th of the month to be guaranteed an appointment for the following month.

Curie Learning is equipped to offer most of the classes and activities college counselors recommend, such as the Writing for College and Career Preparation class, SAT/ACT coaching, AP high school courses in math and science, and volunteer opportunities through Curie Social Services!

Counselor Bios

Mr. Kevin Steele spent 30 years in public education before he retired. He was a history and psychology teacher for 10 years before he spent 20 years as a high school counselor in Henrico, Virginia. During his tenure as a school counselor, Mr. Steele was able to assist hundreds of his students get admitted to the college/university at or near the top of their wish list. Whether it was finding an in-state college or an elite university across the country, Mr. Steele was determined to support his students all the way through the college application process. His coaching mentality of being a part of a team was formed through 28 years of coaching high school and middle school baseball. Mr. Steele is a qualified and enthusiastic counselor who is here to help your child through the daunting application process.

Mr. Carlos Williams has 10+ years of experience supporting youth with workforce development and pursuing educational opportunities. Carlos is from Dunn, North Carolina and has a bachelor's degree in psychology from the University of North Carolina at Charlotte, a master's degree in educational psychology from the University of Arizona, and is pursuing a doctoral degree in Educational Policy and Leadership from the University of Maryland, College Park. In his roles as an Academic and Career Advisor at various institutions, Carlos has supported diverse groups of students with college and career access, navigating the application process for applying to professional schools, and crafting personal statements to accompany their college applications. Carlos takes a holistic approach to supporting students to ensure success in their academic endeavors and is excited to serve as your college counselor to help you reach your academic goals.

Curie Learning's Signature
Continuing Level 8 Program – Rising 8th Grade

Our Winter Level 8 program incorporates high-level coursework in math, English, writing, and critical thinking. This program will prepare students to succeed in SAT/ACT and even thrive in high school and later in college.

Message from Dr. Rao Mulpuri:

"During the last five months, we spent a lot of time on ACL and TJ preparation. The ACL Exams are over, and I am pleased with the way our students prepared and performed for the ACL exams.

The TJ Preparation will continue through the end of January and a review session and last 3 TJ Practice Exams will be held in January. Two Sunday morning classes will also be held in January.

In math, I have been teaching Algebra-2 since October. I will be finishing a complex number algebra unit in November/December. The rest of Algebra-2 (rational functions, exponential and logarithmic functions etc) and Trigonometry will be covered from January 2026 through the second week of June 2025. The major focus in those 6 months will be preparing the students for PSAT/SAT/ACT and Algebra-2/Trig in 9th grade, which are taught at a high level at TJ and ACL. Some students struggle with this course at both ACL and TJ. Students admitted into ACL are made to repeat Algebra-2, even if they completed it in 8th grade. The math material next semester includes about 50% of Pre-Calculus as well.

Our prep from Level 7 has been focused on SAT/ACT (while covering whatever is required for ACL and TJ Entrance tests), but there are more topics (in Algebra 2/Trig/Pre-calculus) that need to be covered and more grammar/reading comprehension practice to be done so that the students who continue with us do not need any SAT/ACT prep classes during high-school years. As you know, all good colleges look at SAT/ACT scores and responses written for college admission essays in the admissions process.

Due to these reasons, continuing through June 2026 is a good idea so that there is no need for SAT/ACT coaching during high-school years when students are hard pressed for time to attend SAT/ACT coaching classes during 10th and 11th grade, while worrying about their AP courses. In English, while continuing grammar/reading comprehension, we also focus on analytical and narrative writing to prepare students for college admission essay writing. Mr. Fletcher will be in-charge of the writing program.

This also prepares students for writing sophomore admission essays at TJ and junior admission essays at AET, in case they are not accepted for 9th grade admission and you decide to try again during 9th/10th grade. After going through Curie 4th semester writing our students do not need any writing classes during the high school years.

Reasons that students should continue this program:
Whether the student decides to attend challenging magnet schools (TJHSST, Academies of Loudoun, etc.) or any outstanding public or private high school in their area, students are still encouraged to maintain the momentum of developing new skills and understandings of concepts beyond what they already know. These skills are beneficial for the future of each student throughout and beyond their education.

Description for Level 8 Algebra-2/Trigonometry and English (including topics covered):
From October 2025 through June 2026, in Math, we cover Algebra-2/Trigonometry topics at an advanced level to ensure that during the next academic year, students can easily handle this course regardless of whether they attend challenging programs like TJ/ACL or their base high-school. Topics to be covered from January 2026 include, but are not limited to trigonometric functions, trigonometric algebra, exponential and logarithmic functions, rational functions. Some of these topics are part of Pre-calculus as well. As we do in all our math courses, an emphasis will be placed on application oriented word problems. We also cover Algebra-2/Trigonometry material relevant for SAT/ACT. In English, we will continue grammar and reading comprehension practice and the writing part includes narrative essay writing and analytical writing from February, after (TJ entrance is over at the end of first week of January). The narrative essay writing covers college admission essay writing as well. "

For 4th semester, you will need to re-register your child (no registration fee) and confirm the new schedule. We request all parents to fill the enrollment form below if you want to continue your child in the program.

SEE NEXT PAGE FOR SCHEDULE DETAILS

SCHEDULE: Continuing Level 8 Program – Rising 8th Grade Including (TJ Prep) for Month of January

	General Semester	Continuing TJ Prep from 12/21/2026 – 1/3/2027 ONLY:	One Subject Only Weekly Classes Math OR English	Only English (Online) + Writing
