Curie Learning's Signature Level 7 (Rising Level 8) Program including (TJ/AoS/AET)

\$350/month
Math, Reading, Grammar,
Writing & More

Curie Signature Level 7/Level 8 program is intended to provide a strong foundation in both math and English during middle school years. Foundational knowledge required for TJ/AOS/AET entrance exams is also provided in this program. While getting into the specialized high school programs like TJ/AOS/AET is one important aspect, the ability to cope with the challenging curriculum at these schools is another important aspect that needs to be addressed during 7th and 8th grade years. This program addresses this important aspect. In 22 months of Curie Signature Level 7/Level 8 program, students will get 18 months of training in English writing; 22 months of training in grammar, vocabulary and reading; and 22 months of intense training in math covering arithmetic, Algebra-1, Geometry, Algebra-2 and trigonometry. In this program, by the end of Level 8, students are taught all the material required for excelling in PSAT/SAT/ACT as well.

Level 7 (Rising Level 8): Semester 3 Alternative Packages and Fees

THE PACKAGES BELOW **ARE NOT** INTENDED FOR THOSE WHO ARE ALREADY ENROLLED IN OUR REGULAR LEVEL 7 SIGNATURE PROGRAM.

THE ALTERNATE PACKAGESS BELOW **EXCLUDE** OUR WEEKLY MATH AND ENGLISH CLASSES.

With these packages, students will be missing the curriculum taught in our signature Math and English which include grammar instruction, reading comprehension instruction, vocabulary instruction and higher-level mathematical concepts; these are skills that will better prepare students to excel in any higher-level high school program such as TJ/AOS/AET.

*** Please note that all these packages are a continuation of our Signature Level 7 Course. New students are welcome to register, but with the understanding that they will have missed the materials taught during the previous semesters. However, these classes can still be beneficial for new students as they will introduce them to AOS/AET/TJ Prep Material. ***

ENGLISH COURSES

Summer Bridge English Program For Rising Levels 4–7

\$250/month
Total Classroom Teaching:
16 HOURS

For new Curie Learning students who want to “bridge the gap” so they are prepared to join the next level in the upcoming school year!

This **eight-week** course offers a condensed version of our school year English class. Students will have weekly writing and grammar lessons, the most important lessons chosen from our school year class. Students will also write an essay and receive feedback on their rough draft and final draft. At the end of the class, students will take the placement test. A passing placement test score will allow them to join the next level for the upcoming school year.

Students will only be permitted to join the sections for which they are registered. Class recordings will not be provided, also students are only allowed to attend their registered session.

Important Notes:

- Taking this class does not guarantee that students will be able to join the next level for the following school year; this depends on the student’s performance in the class and on the placement test.
- If you are contemplating joining both Bridge English and Bridge Math, consider the time requirement. Each class requires an estimated 2-3 hours of homework each week outside of the class.
- Rising third graders are welcome to join the Nonfiction class; this should help them prepare for the next school year (see next pg.)

Nonfiction English Reading and Writing For Rising Grades 3–7

\$220/month
Total Classroom Teaching:
10.5 HOURS

This **seven-week** course focuses on strategies of reading nonfiction material. Students will read nonfiction books and articles and participate in discussions, activities, and written work about the material read. They will also write essays and receive weekly feedback on their writing from their teacher. This class is highly recommended to improve reading comprehension skills, and help students in writing essays on diversified topics. (Knowledge of diversified nonfiction topics is crucial for success in many academic subjects as well as the TJ/AOS admission process.)

Students will only be permitted to join the sections for which they are registered. Class recordings will not be provided, also students are only allowed to attend their registered session.

Summer Bridge Math Program

This **eight-week** course is recommended for **students who are new to our program** or who would like to “bridge the gap” between levels during the summer months. For those who plan to join our program for the upcoming year, this will give the student a boost for the upcoming school year. This is also good for new students who are only interested in a summer program in order to continue learning and practicing math skills. **The curriculum used for this course includes units that are taught in our program for the previous school year; for example, an advanced rising 6th grade student will be taught most of our Level 5 curriculum in this course and will be on track to take our Level 6 program in the fall.** The teaching will be conducted in a small group setting according to grade level. Students will be given videos and homework after every session which will need to be done before the next class. Parental support will be needed to help monitor the homework, and parents will be given answer keys in order to provide the student with the immediate feedback necessary.

MATH COURSES

Algebra 1 (Rising 7th – 9th Grade)

\$500/month
Total Classroom Teaching:
32 HOURS

This **eight-week** course is intended to prepare students for taking high school Algebra 1 during the upcoming academic year. Whether students are taking Algebra 1 as a seventh, eighth, or ninth grader in their day schools, our program will help prepare students for this high school-credit math class (which affects their high school GPA). This course give the students a head start with the Algebra 1 concepts, also helping them to transition into an advanced high school level course by expecting a certain degree of rigor and independent learning skills. Also, gaining a thorough understanding of Algebra 1 concepts is necessary for scoring well on the SAT/ACT. Many colleges and universities are again requiring these scores for student application. It is difficult to handle Algebra 2, Precalculus and other higher level courses without a solid foundation in Algebra 1.

Topics include:

Solving One and Two Step Equations (including word problem practice), Multi-Step Equations (including word problem practice), Multiplication and division rules of exponents, Inequalities, Radical Equation Solving, Absolute Values Equation Solving and graphing, Linear Equation Graphing and Application, Systems of Linear Equations, Quadratic Equation Solving and Application.

Students will be given instructional videos as a reference tool for the lessons, but the lessons will be taught during class time.

COMPUTER COURSES

Intro to JAVA Course

Rising 7th Grade and Up

Ronit Manchanda

Introduction to Java is an **Online, Six-week-long** course designed to provide rising 7th–9th graders with a structured introduction to computer science and programming using Java. The course is project-based and focuses on real-world applications, allowing students to practice coding through interactive assignments and guided projects. By the end of the course, students will have developed a solid understanding of Java fundamentals and completed multiple coding projects.
