

CASED HOLE LOGGING

Step Rate / Injectivity Survey

APPLICATION

Step Rate / Injectivity Survey
to evaluate Injection profile
and reservoir performance.

TECHNOLOGY

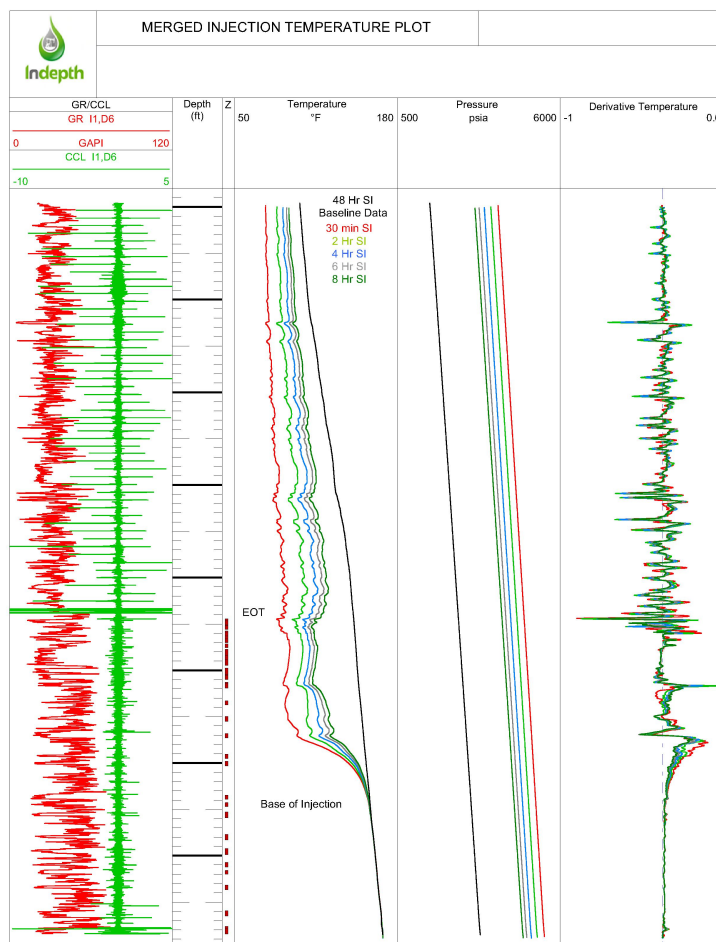

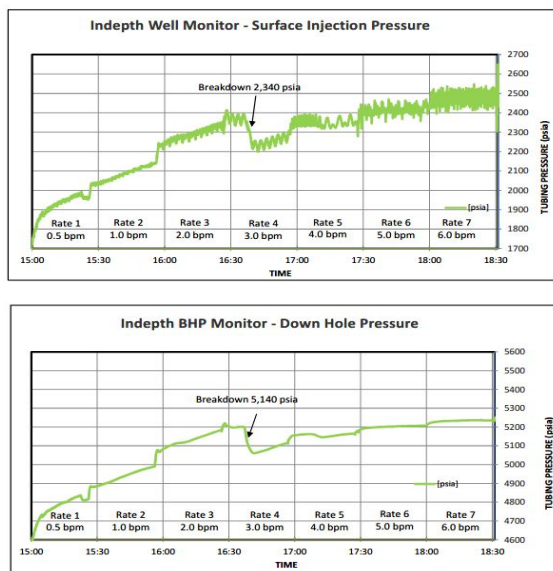

SRO Pressure/Temperature
Memory BHP
Indepth Performance Monitoring

LOCATION

Texas, USA

CHALLENGE:

To perform Step Rate Test as per state regulatory board requirements in a reliable and Indepth manner that avoids lost time and extra costs.
Indepth Production Solutions is selected to run our SRO Pressure, Temperature, Memory Tandem BHP and Indepth Well Performance Monitor because of our redundant measurements and proven reliability.

INDEPTH SOLUTION:

Indepth Production Solutions complete Step Rate / Injectivity Survey consisting of SRO Pressure, Temperature, Memory Tandem BHP along with real time surface pressure data was combined to cover this Board requirement. Indepth provides the most reliable and redundant system in the industry to complete this task.

CLIENT VALUE:

State Board required logs need to be run correctly the first time with no lost time or data discrepancies. Indepth Production Solutions is your choice for reliable and accurate data to satisfy your regulatory requirements.
