

AutoBOD bottles are now available for separate purchase from Woods Hole Analytics LLC. Replace damaged bottles or switch out samples during measurement. The bottles are ready to place in your AutoBOD upon delivery. Each bottle is individually equipped with the high-quality PreSens[®] spot you are accustomed to. We perform a quality check on each bottle.

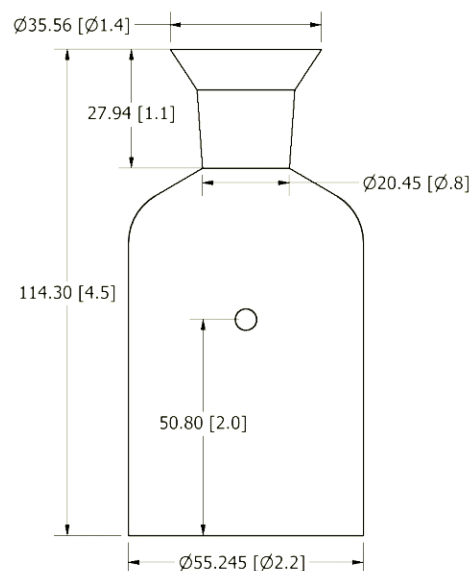

Specifications

Standard BOD bottles

Dry weight: 109 g

Full volume: 157 mL

All bottles are marked with the spot batch number. Orders placed at the same time will have spots with the same batch number.
