Konnect

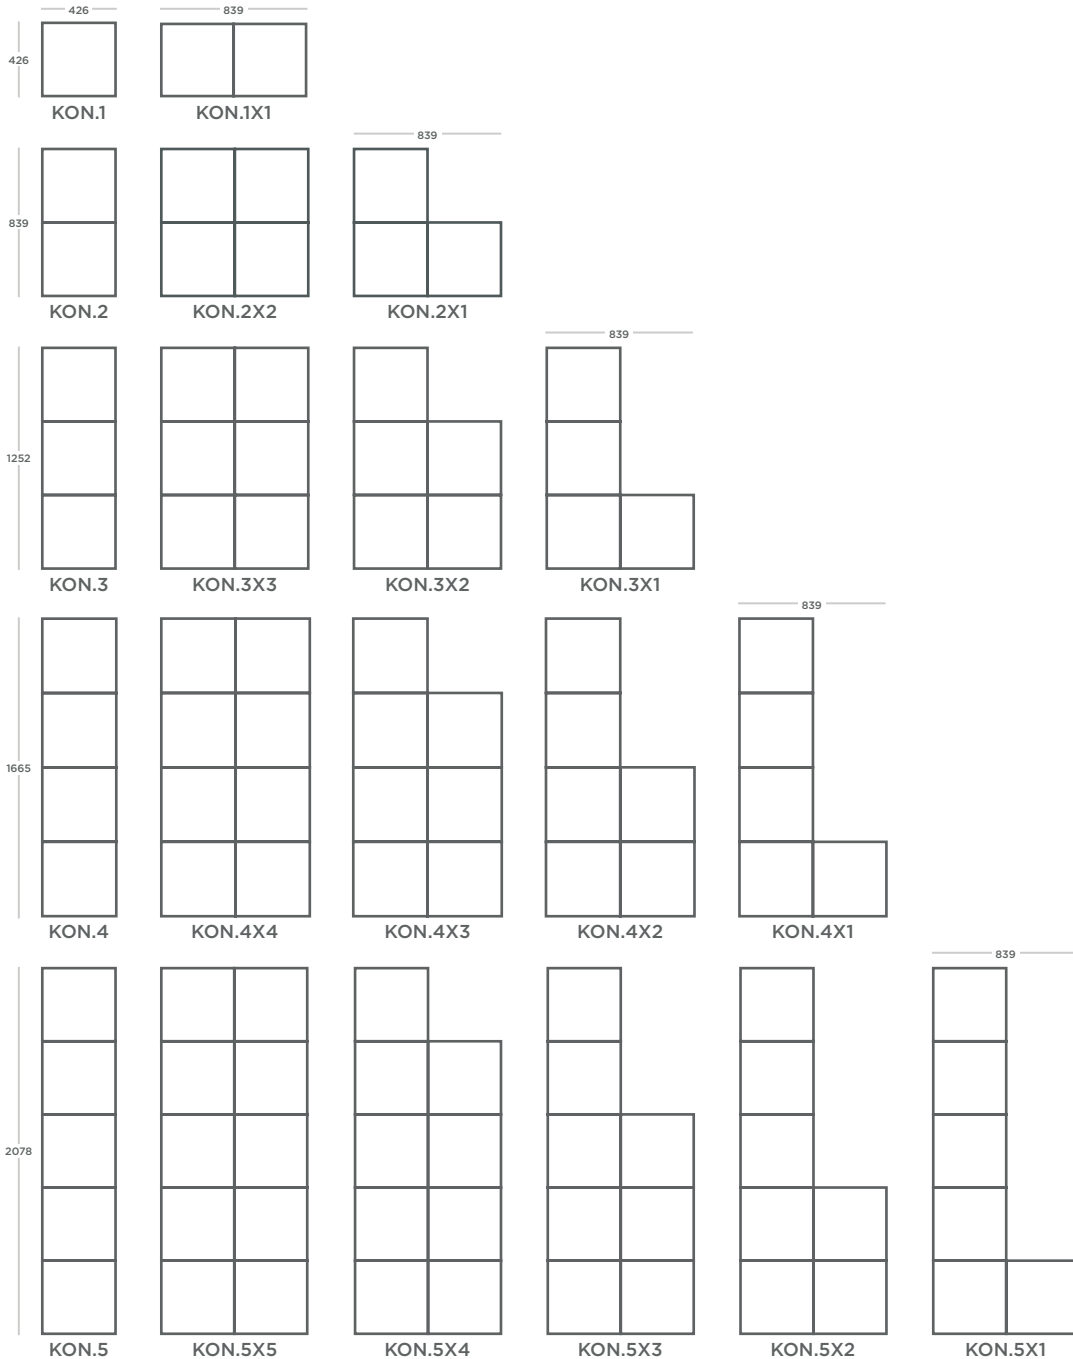

Shelving | Storage | Zoning

Konnect is a modular grid-based shelving and storage system, designed to create flexible zones within a workspace. A configurable, extensive range of accessories can be added to the metal structure to provide functional, biophilic and storage options to an environment. The range also provides media applications and desking for office or remote working. Developed with sustainability in mind, we have reduced the number of plastic components and fixings. The Konnect accessories are engineered to fit within the metal frame and allow the user to constantly adapt and evolve their spaces.
