**PRODUCT NOTES**  
 \*\*When selecting floor fixing (FF) option the standard foot as shown is replaced with a T shaped leg that allows the unit to be fixed to the floor. Fixings not included.  
 \*\*\*The Tip-Up seat (TP) option includes the T shaped leg at no additional cost. This allows easy access. The beam must also be secured to the floor for stability.  
 \*\*\*\*The Table location is always given from the seated position. When ordering use the following method to clarify the location of the table. e.g. MA5TCCB.  
 This indicates a two seat beam with a table positioned in the middle unit. A two seat beam with a table top on the right would be MA5CCTB.

These diagrams represent a selection of useful layout ideas and are not to scale.

City is principally suitable for multi-purpose facilities and where training and meeting furniture is required, but space is a premium.

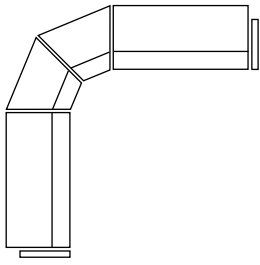

## ASSEMBLY

City Tables are delivered unassembled. Assembly requires the construction of the frame before sitting the top.

We advise that two people carry out the process.

## DIMENSIONS

Our soft seating units are manufactured using templates, fabric patterns, foaming methods and assembly techniques to help us ensure our quality standards remain high and consistent.

All dimensions provided are approximate as product size may vary slightly due to variation of the upholstery or depression of foam when assembled.

We suggest that if products are being specified for a bespoke area that is being built to contain single or multiple units, or the space planning is particularly tight, it is strongly recommended that a product clearance is taken into consideration. Please allow a tolerance of 15mm per unit in both width and depth to accommodate the products into the plan or build.

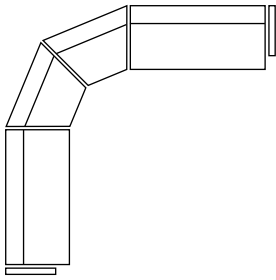

## ASSEMBLY

Fifteen units are delivered unassembled (where indicated) and can be assembled easily on-site. We advise that two people carry out the process.

If several units are required for a configured layout we recommend the units are fitted together using the optional Fixing Plates.

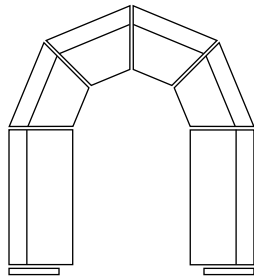

NB. Fifteen Internal and External units are supplied with these plates as standard.

## Sustainability Approach

### SUSTAINABILITY

Every seating product has an impact on the environment throughout its life cycle, from extraction of the raw materials, production, to final disposal and recycling.

As a company Pledge are committed to reducing the environmental impact of all products produced and distributed from their Bedfordshire manufacturing facility, with the ultimate goal of contributing towards the creation of a sustainable society for future generations.

Pledge are confident that we have an environmental policy which reduces waste and energy. With a clearly defined set of objectives, our aim is to ensure that Pledge is run in an environmentally friendly and sustainable manner with the minimum amount of impact to the environment.

Pledge' approach to sustainability means operating and growing the business in such a way that meets the needs of the present whilst conserving resources for future generations.

We believe that to ensure continued success, our commitment to fairness, integrity and honesty must extend beyond our members and employees to the communities in which we operate, to our partners and to the environment at large.

All manufacturing activity has some impact on the environment.

It is the policy of Pledge to make itself aware of the impact of its activity on the environment, and reduce that impact wherever possible.

It is also Company Policy to conduct its business in the light of developing and understanding evolving technology in ways designed to reduce adverse effects on the environment working with like minded companies to achieve this.

### OUR RESPONSIBILITY

As a manufacturer, we believe we should ensure that the company, as a whole, produces the smallest carbon footprint possible.

Listed here are a few of the ways we achieve this:

- > Ensure that we procure from companies that adopt procedures to reduce carbon emissions
- > Source wooden products from well-managed and other controlled supplies (FSC®)
- > Eliminate the use of harmful substances and chemicals
- > Control deliveries to minimize emissions from vehicles and wasting fuel
- > Ensure that our manufacturing base uses fuel efficiently

This is demonstrated with compliance to, and obtaining independent audits from our accreditation to ISO14001, and FISP - Furniture Industry Sustainability Programme.

It is our belief that Pledge can achieve a greater reduction in its overall environmental impact and we consider this to be our responsibility.

### TEST & CERTIFICATION

Pledge Chairs Ltd is accredited to ISO9001. Whilst all chairs are manufactured to conform to all the relevant British and European standards, most of our models are a ISO certified to these standards.

As a company we carry out constant independent testing to make sure that all our products are durable and safe.

We believe we have more products tested and certified than many other manufacturers, and will test products for certification should it be required to fulfil a tender specification.

### ENVIRONMENTALLY CERTIFIED

The Company recognizes that it has a duty to reduce, wherever possible, the impact of its operations on the environment.

A Chain of Custody certificate is evidence that a business has installed management systems that enable an environmentally certified product to be tracked back to its source, thus proving that the product actually possesses the environmental credentials claimed for it.

While the presence of an environmental label, such as FSC® on a product indicates that the wood it contains comes from well-managed forests that are independently certified and other controlled sources, any subsequent owner of the product requires their own Chain of Custody certificate to be able to describe the goods as environmentally certified to the consumer.

Only possession of a valid certificate entitles a business to use environmental trademarks and logos in promoting or describing environmentally certified products.

Pledge Chairs Ltd operates under certificate number: TT-COC-001809 for FSC® Certified product.

### CARBON BALANCED PRINT

Carbon Balanced Print is the highest statement of integrity for users and producers of printed products. Along side the use of carbon balanced paper, it is produced by a carbon balanced printer - a printer that has measured and balances the annual impacts of its fossil fuel usage, transport and electricity consumption.

These impacts are third-party verified, and then balanced (offset) with international conservation charity World Land Trust (WLT). World Land Trust (Charity No. 1001291) is an international conservation charity that protects the world's most biologically significant and threatened habitats acres by acre. To date World Land Trust has helped secure more than 881,000 acres of threatened habitat in 20 countries. World Land Trust's patrons include: Sir David Attenborough, Steve Backshall, David Gower & Chris Packham.

WLT offsets these emissions by protecting threatened habitats that would otherwise have been lost, avoiding the release of stored carbon. This also enables the regeneration of degraded habitats, which gradually re-absorb atmospheric CO<sub>2</sub>.

## ENVIRONMENTAL STANDARDS

### FURNITURE INDUSTRY SUSTAINABILITY PROGRAMME

Sustainable development is now an important issue for all businesses and especially so for furniture manufacturing.

Governments, retailers and increasingly consumers are demanding that the products they purchase should be produced sustainably and an industry-wide initiative has been created to achieve this benchmark practice. Pledge are full members of this programme.

The Government has identified four key objectives for delivery of sustainable development:

- > Social progress which recognizes the needs of everyone
- > Effective protection of the environment
- > Prudent use of natural resources
- > Maintenance of high and stable levels of economic growth and employment

### BS EN ISO 14001

BS EN ISO 14001 is an internationally accepted standard that sets out criteria that allows for third party applications of an effective Environmental Management System (EMS).

This standard is designed to address the delicate balance between maintaining profitability and reducing environmental impact; with the commitment of our entire organization, it can enable us to achieve both objectives.

### FOREST STEWARDSHIP COUNCIL®

The Forest Stewardship Council enables you to buy our products with confidence that you are not contributing to global forest destruction. A system of chain of custody certification traces forest products through the supply chain, through all stages of production and distribution and finally to Pledge.

Pledge, in accordance with the universal requirements of the council, takes ownership of their timber products; monitor their purchases, handling and sales of FSC® certified material.

This is audited by accredited certification bodies that make sure that the systems are adequate to maintain the integrity of the FSC® label before issuing a Chain of Custody certificate, with a number unique to the organization.

## RECYCLING

Pledge work with 3B Recycling to improve recycling practices; developing a zero to landfill solution for all recyclable cardboard and plastic films generated on site.

This strengthened approach to waste handling has resulted in over 35.4 Tonnes of cardboard being diverted from landfill within the report period.

Pledge will continue to work with 3B Recycling in line with the UK Government's Resources and Waste Strategy for England, putting a strong focus on Corporate Social Responsibilities towards minimizing waste, promoting resource efficiency, and moving towards a circular economy.

## 2022 RECYCLING REPORT

### FABRIC SUITABILITY

Not all standard fabrics are suitable for all of our products.

High wool content fabrics are more suited to task, meeting chairs and soft seating in wide ranging contract areas.

Whilst standard polyesters are more suitable for simpler task and meeting chair applications, coated polyesters and vinyl's are the logical solution in those "tougher-than-usual" upholstery situations.

If an unsuitable fabric/product selection is made the fabric may become baggy or have unnecessary pleats in the upholstery.

We have included simple suitability icons next to each fabric range to help you to choose an appropriate fabric.

### UPHOLSTERY SHOWN

The material a product has been upholstered in is displayed under the Upholstery & Product Notes at the bottom of each pricing page.

While every effort is made to represent colours accurately, we cannot guarantee the colours you see exactly match the colours of the actual fabrics due to printing processes.

Please contact our Sales Desk if you would like any fabric samples sent out to you.

### FABRIC GROUPS

Please contact our Sales Desk for a price if the product is not listed.  
Please make sure you check the suitability of a fabric before recommending a product.

### FABRIC SURCHARGE

Fabric manufacturers not listed in the fabric guide will be subject to a £15.00 net surcharge.

### CUSTOMERS OWN MATERIAL

Fabrics not listed or customer supplied fabrics (COM) need to be approved by Pledge before the acceptance of orders. A pattern charge may apply for some fabrics.

We also reserve the right to reject fabric that we believe to be unsuitable for the product.

We are unable to guarantee any product meeting fire regulations or standards which is supplied in a COM.

### COLOUR VARIATIONS

Whilst every effort is made, no guarantees are made against the variance in colour of commercial fabrics, this may be apparent on repeat orders.

All striped fabric will be upholstered vertically unless advised.

### LEATHER

## COLOUR SAMPLES

Due to limitations of printing we cannot guarantee the colours you see exactly match the colours of the fabrics, woods, plastics or steel. While every effort is made to represent colours accurately, we recommend you request a sample of the fabric, wood, plastic or steel finish before placing an order.

## SPECIAL STAINING

Pledge will make every effort to reproduce a stain colour likeness taking in to account the variance in materials and age of the original sample by the client. All stain matches are tested first, with a sample sent to the client for approval before the chairs frames are produced.

The cost for special staining to match existing furniture is detailed on the product page under options.

# 193 | CARE & MAINTENANCE

## Materials & Finishes

### RAL & METALLIC FINISHES

To remove dust, salt and other deposits, Use a soft brush (non-abrasive) and a dilute solution of a mild detergent. e.g. PH-neutral, liquid hand dish washing detergent in warm water (DO NOT use solvents). Carefully remove any loose surface deposits with a wet sponge.

### MFC TABLE TOPS

Due to its resistant, hygienic and dense surface, these laminates do not require any special form of care. The surface is generally easy to clean.

Do not use sanitary cleaners or detergents with abrasive components, as such cleaners may lead to changes in the gloss level and/or scratching of the material.

### MOVING PARTS

(CASTORS, SEAT & BACK MECHANISM)

Dust and grit should be removed using a soft brush or vacuum cleaner with a soft brush attachment. Do not attempt to clean with any fluid. Do not attempt to oil or grease any components. If in doubt contact our technical support

### PLASTIC COMPONENTS

Dust and grit should be removed using a soft brush or vacuum cleaner with a soft brush attachment. Clean with a damp cloth with a mild detergent

### FABRICS

#### UPHOLSTERY:

Fabrics don't look after themselves, even those with additional stain repellent treatment.

We provide wear guarantees with our fabrics, however, without proper care and attention they can look old and dirty well before their time. In extreme cases they could even wear through.

Fabric care in the workplace and contract interiors isn't rocket science and there are obvious parallels to how you look after upholstery fabrics in the home. Following a few simple rules can add years to the wear life and appearance of what should be the most visually appealing element of furniture.

We have a full cleaning guide available, but here are our top tips for fabric care and maintenance:

- > Vacuum your fabrics regularly to prevent build-up of dust and dirt on the fabric surface.
- > Get to spills and stains quickly. Mop up the excess liquid using kitchen roll or a damp cloth. Then clean using upholstery shampoo, detergent or hand wash.
- > Always use a branded upholstery shampoo. Alternatively, both wool and polyester can be dry cleaned.
- > For spill or stain prone areas, a stain repellent finish can be applied to certain fabrics.
- > Alternatively, choose a wipe down upholstery solution.

#### LEATHER:

Cleaning is perhaps something that is given too much emphasis. Leather furniture in a normal domestic environment should require little attention and any cleaning should be done only when necessary. It is not essential to the life of leather that it should be cleaned regularly, but at the same time an accumulation of dirt and grease over a period of time is undesirable and obviously, the longer it is left the more difficult it will be to remove.

Dirt is abrasive and over a period of time in extreme circumstances will cause the removal of the protective coating.

Regular cleaning can be done simply by using a damp cloth, taking care not to soak the leather. It should be noted that full grain aniline leather or russet leathers cannot be cleaned with water or soap solution. Any attempt to do so could result in the leather being irreparably damaged.

- > Use a cloth soaked in a mild soap/water solution (non detergent) and wring it out until damp.
- > Apply the cloth to the surface of the leather in a light circular motion, turning the cloth regularly.
- > Avoid aggressive rubbing action. Repeat with a damp cloth rinsed in clean warm water.
- > Allow to dry and then lightly polished using a clean, dry soft cloth.
- > Don't use cleaning fluids and preparations unless specifically directed by the tanner.
- > Don't over clean - leather really doesn't take much to look after.
- > Don't use wax/spray polishes - upholstery leather is not the same as shoe leather. Wax polishes and furniture spray will often contain silicone which will, in time, produce an unpleasant sticky feel to the leather.

- 6.4 The Buyer may resell the Goods before ownership has passed to it solely on the following conditions:
- (A) any sale shall be effected in the ordinary course of the Buyer's business at full market value; and
