karboxx

A close-up photograph of cotton bolls on a branch, with the text "OFFICE LIGHTING AND ACOUSTIC PANELS" overlaid in white. The cotton bolls are white and fluffy, with some brown, dried leaves still attached to the stems. The background is a soft, out-of-focus blue sky. The text is positioned in the upper left quadrant of the image.

SOURCE OF DESIGN

From Karboxx's experience with research, high-tech and minimal design applied to indoor lighting, we have developed our range of office lighting. This is a new collection based on LED technology, designed to illuminate working spaces with attention to the needs of professional environments and corporate offices.

Karboxx communicates an advanced concept of lighting design that takes care of both the physical and emotional wellbeing of workers by stimulating creativity, encouraging levels of concentration while positively influencing the style of working environments.

SORGENTE DI DESIGN

Dall'esperienza Karboxx nella ricerca, tecnologia e design minimal applicato all'interpretazione della luce per interni, è nata la linea di illuminazione ufficio. Si tratta di una nuova collezione basata sulla tecnologia a LED, progettate ad hoc per l'illuminazione dell'ambiente lavorativo, con un'attenzione peculiare alle esigenze degli studi professionali, di uffici operativi e direzionali di pregio. Karboxx irradia un concetto evoluto di light design che si prende cura del benessere fisico ed emotivo di chi lavora, stimolando la creatività, favorendo la concentrazione e caratterizzando con coerenza lo stile degli ambienti.

DESIGN_MORENO DE GIORGIO

Maximum efficiency and space usability, Fly is the ideal solution for work spaces requiring lightness and elegant functionality. Fly is based both on advanced concept and LED illuminating material. The flowing design of elements, with minimal and smoothed profiles, hides a sophisticated device of perimetral injection light, applied to a specific methacrilate that spreads and deviates the light flow perpendicularly towards the surface to be illuminated. Fly introduces an aerodynamic silhouette designed for achieving both the comfort and performance.

Massima efficienza e fruibilità dello spazio, Fly è la soluzione ideale per ambiti di lavoro che richiedono leggerezza ed elegante funzionalità. Fly si basa su avanzati concept e materiali dell'illuminotecnica a Led. Il design fluido degli elementi, con profili minimi e levigati, nasconde un sofisticato dispositivo ad iniezione luminosa perimetrale, applicato ad un particolare metacrilato di ultima generazione che diffonde e devia il flusso luminoso perpendicolarmente alla superficie da illuminare. Fly presenta una silhouette aerodinamica progettata per il comfort e la performance.

FLOOR MORE

DESIGN_MORENO DE GIORGIO

More is the iconic result of a defined typology of lamp in the office lighting that shows the evolution of both design and technology. More seeks performance and pleasantness for the contemporary office with a compact and architectural design with a reduced visual impact made of simplicity and essentially.

More presence, close to work stations, is unique and delicate thanks to its proportions of logic, power and linearity. Nothing is redundant, all is functional and defined in every detail. More is made of high standard components: state-of-the-art led, touch controls, micro-prismatic diffuser and aluminum extruded profiles. More recalls the attention to the elegance of shapes achieved by the technological evolution, for a pleasant office.

More è l'originale risultato di una tipologia formale corretta nell'office lighting, nella quale l'evoluzione della forma si rinnova nella costante ricerca di tecnologia e design applicato ai materiali. More ricerca prestazione e gradevolezza per l'ufficio contemporaneo, con un design compatto e architettonico a ridotto impatto visivo, fatto di semplicità, essenzialità e cura del dettaglio. Logica, potenza, linearità in nuove e inedite proporzioni rendono More una presenza unica e discreta accanto ai tavoli di lavoro. Nulla è superfluo, tutto è funzionale e curato in ogni minima scelta. More è dotata di componenti ad elevato standard: Led performanti di ultima generazione, comandi touch, diffusore microprismatico, profili estrusi in alluminio. L'immagine di More richiama l'attenzione all'eleganza delle forme che l'evoluzione tecnologica consente, per un ufficio soft e gradevole.

MicroStick is a smart desk lamp on a simple and compact aluminum body. The 10W LED light source provides a soft, comfortable light, with no strong contrasts. A special touch sensor with dimmer function is used to switch the lamp on/off and to adjust the brightness. MicroStick is available in white and silver. The perfect lamp for your desk, at home or in your office.

MicroStick è una lampada da studio semplice, minimale e compatta. La fonte luminosa LED da 10W emana una luce soft e senza contrasti, ma allo stesso tempo efficiente e funzionale. Uno speciale sensore touch con funzioni dimmer permette di accendere e spegnere, regolandone la potenza di illuminazione. Disponibile nelle finiture bianco e alluminio, MicroStick è la lampada perfetta da tavolo o scrivania, a casa o in ufficio.

ACOUSTIC SOLUTIONS

LIGHTSOUND

DESIGN_MORENO DE GIORGIO

Designing the space to streamline work and ensure a dynamic and efficient environment through functional solutions and by being attentive to the well-being of the person.

LightSound is a system that has been created to meet the acoustic and visual comfort needs, and to create a wellness space in the professional world. Over the years, the fusion between architecture and wellness has an ever increasing presence, for this, work environments must be able to transmit professionalism and harmony.

The human factor and technology are the basic components for the creation of contemporary work spaces.

This product intervenes to create the right lighting and acoustics by reducing noise and, at the same time, perfectly illuminating the area.

The office wellness becomes one of the most important elements of the design. The world of work merges with hospitality, perception and comfort.

Progettare lo spazio per razionalizzare il lavoro e garantire un ambiente dinamico ed efficiente attraverso soluzioni funzionali e attente al benessere della persona. LightSound è un sistema che nasce per rispondere alle esigenze di comfort acustico e visivo, e per creare uno spazio wellness nel mondo professionale. Negli anni la contaminazione tra architettura e benessere è sempre più presente, per questo motivo gli ambienti di lavoro devono essere in grado di comunicare sia professionalità sia armonia.

Il fattore umano e tecnologia sono i componenti di base per la creazione degli spazi di lavoro contemporanei. Questo prodotto interviene per creare una corretta illuminazione e acustica attenuando il rumore e contemporaneamente illuminando in maniera puntuale l'ambiente.

L'office Wellness diventa uno degli elementi più importanti nella progettazione: il mondo del lavoro si fonde con l'ospitalità, la sensorialità e il comfort.

MULTIFUNCTIONAL DESIGN

CONFIGURATIONS

FUNCTIONAL AND AESTHETIC BALANCE

Modularity	The three LightSound modules, with their self-supporting and simple locking system, allow for infinite combinations and forms.
Soft Adjustment	LightSound is able to intervene in areas with visual-acoustic needs without having to require structural changes.
Visual Coherence	The system uses the same B01 fabric folder as the other The Quadrifoglio Group products, which allows for a perfect match among them.
Integrated Comfort	The LightSound system's characteristics perform optimally both for lighting and acoustics.
Area Adaptability	The minimal design allows for the system to be inserted in different areas whether it is hanging or wall mounted, or in an office or a hotel.
