

Our Fertilization, Weed Management and Insect Control Programs are designed using specifications and guidelines provided by the Pennsylvania Department of Agriculture and the Penn State Cooperative Extension Office.

Whether it is your lawn, trees, shrubs, or perennials, we provide a custom program for your landscape. Soil PH, moisture, composition, and placement plays a key role at each property. Testing and assessment will be done to determine what will be most beneficial.

We use quality products tested and used in the industry and on our own properties. Any program is an enhancement to your landscape. Weather and cultural practices such as mowing and watering plays major roles in the health of your landscape.

If we do not service your property for lawn mowing, please consult us as to what best practices would be beneficial to your yard's health.

Insect Control

Grub Control - Single granular application to your lawn during the summer.

Mosquito, Flea, Tick, Gnat

5 applications. One application approximately every 45 days starting in May. Areas treated include your lawn, flower beds, trees, shrubs and ornamentals.

This program helps to control all stages of life of these pests:

Fleas, Ticks, Mosquitos, Gnats,
Beetles, Ants, Grubs, Surface Feeders

Organic Insect Control

Mosquito, Flea, Tick & Gnat

6 liquid applications.

One application approximately every 30 days starting in May. Areas treated include your lawn, flower beds, trees, shrubs and ornamentals.

This program helps to control:
Fleas, Ticks, Mosquitos, Gnats
Beetles, Ants.

This is an all organic solution of different plant oils and extracts. Plus it has a great spearmint scent.

Lawn Care

Premium - 7 applications that includes: Fertilization, lime treatment, grub control, pre emergence crabgrass, pre and post emergence weed control for dandelions, clover and most common weeds. Spot spraying included.

Standard - 4 applications that includes fertilization, pre emergent crabgrass, pre and post emergence weed control for dandelions, clover and most common weeds.

Basic - 2 applications (Spring and Fall) that includes fertilization, pre emergent crabgrass, pre and post emergence weed control for dandelions, clover and most common weeds.

Fertilization

All lawn care includes lawn fertilizer. We do offer just fertilization for your lawn as well.

Lime

Our lime program is not your typical pelletized lime. The product Solu-Cal that we use is designed to optimize your soil pH, a major factor in nutrient availability, microbial activity, soil structure and overall turf vigor. It accomplishes this in thirty days as opposed to the ninety to one hundred twenty days that regular lime takes.

Aeration

Core aeration of your lawn.

Dethatching

Mechanical raking of your lawn and collection of the thatch and debris.

Over Seeding

Over seeding of quality seed to fit your lawn's needs.

Tree, Shrub & Ornamentals

4 step program that includes: one deep root, season long, slow release fertilization; one deep root systemic insect control; one topical insect control; one dormant oil treatment.

Ornamental Beds

Pre Emergence and Post Emergence control that won't damage perennials.

Ground Clear

We have a variety of options to keep gravel areas such as driveways and parking lots clear of all vegetation.

Poison Ivy

We offer both chemical and mechanical options for poison ivy removal.
