

HAS **HEAT** BECOME ONE OF YOUR BIGGEST **OFFENDERS?**

Benefits

- Reduce equipment maintenance & outage costs
- Reduce downtime of officers and vehicles
- Increase officer confidence in equipment reliability

Features

- 120mm fans with low noise (35 db), 75 cfm each (total 150 cfm)
- Thermostat control: Programmable (+32 F to +140 F)
- Directional porting
- 16 gauge cold rolled metal sheet
- Black powder-coated standard cover plate
- Robust construction of field-tested design
- Custom designed for easy, rear-deck installation

Upgrade Options

- Custom lettering
- Color
- Texture

* Patent pending

TAKE CONTROL

If heat is wreaking havoc on the equipment in your ground vehicles and crippling your force, take back control. The dual-fan, interval and sensory-controlled system pulls cool air from the cabin and pushes it into the trunk of the vehicle to keep your gear working when you need it.

"Since putting in these fan systems from Trinity Innovative Solutions, we have not lost a ground unit to equipment overheating!" - J, Dallas PD
