- Hi Performance Antenna
- Pre-Configured for “Just Add Power” deployment
- Options
  - Bridge Enclosure (Multi-Lane Intersection Coverage)
  - DVR 2 TB of storage
  - Fiber Optic Connections
  - Radio Frequency (RF) Connectivity

Trinity Innovative Solutions (TIS) manufactures a complete line of “*turnkey*” portable surveillance enclosures for all deployment scenarios. All components are *pre-configured and tested* to the end user specifications prior to deployment to ensure rapid deployment and full functionality.

These enclosures have been designed using *tested* components that perform in the *harshest* environmental conditions day after day. *Pre*-configured for all deployment scenarios; they can be remotely monitored and maintained. Modular components can be added and removed to cover a wide range of deployments based deployment scenarios. *Built to last*, but easy to maintain; *does not require* a master technician to keep running. “*Break and Fix*” *simplicity*; if a component fails it can be swapped out putting the system back up and running with a *minimum* of down time and *little* technical expertise.

*“True Solutions...Innovatively Designed”*
