

JOB: AGRICARBON FIELD OPERATOR

(National Talent Pool)

Agricarbon is an ambitious start-up in the fast-emerging soil carbon space. Based in Scotland, Agricarbon is targeting established international carbon removal markets (eg US and Australia) whilst helping to develop the soil carbon market in the UK. Through science-led innovation in automation and systems engineering, Agricarbon aims to set a global gold standard for reliable, affordable soil carbon certification and unleash a new wave of climate mitigating regenerative farming practices. Agricarbon develops innovative technology-based services that measure soil carbon with the highest level of accuracy and at ultra-low cost. This is a vital missing link to allow soil carbon capture projects to demonstrate and secure payments for CO2 removal, unlocking farm soils as a vast carbon sink opportunity.

Ruralink: Ruralink works with the military community and many other organisations to help members of the military community find follow-on careers in the land-based sector.

The Role: Through 2022, Agricarbon aims to build a team of over 70 field operators and team leaders operating on a range of regionally-based and nationwide fixed-term and full-time contracts. These are front line, hands-on roles operating Agricarbon’s cutting edge soil sampling platform with opportunities to grow with the company. As a Field Operator you will report to Agricarbon’s Field Operations Manager (ex-RM). You will operate Agricarbon’s field machinery (ATV & soil sampler) and be primarily responsible for the successful extraction of high quality soil cores with specialist equipment and collecting all associated data via a mobile app. You will work as part of a 2-person field team, operating your own platform for which you will be personally responsible, including daily and weekly maintenance.

You: are a highly self-motivated, friendly, punctual and diligent individual who takes pride in carrying out your work efficiently and to a high standard. You are proactive and hands-on, enjoy solving problems when they arise and finding solutions independently, as well as part of a team. We hope you will be inspired by our mission and motivated to help the wider team succeed.

You must have:	Nice if you have:
<ul style="list-style-type: none"> · Practical skills to operate equipment alone, including understanding of H&S · UK Cat B driving licence · Experience in basic vehicle/equipment maintenance · Good verbal and written communication skills · A reasonable level of physical fitness and resilience for working outdoors 	<ul style="list-style-type: none"> · Some experience operating hydraulic machinery · ATV off-road driving experience; understand UK countryside code and/or working in a farming environment · IT and data entry skills on mobile phones and laptop · First Aid trained · 3.5 tonne trailer towing license (Cat B+C Unrestricted) · Previous soil sampling experience · Vehicle mechanic skills
