

## **PHOTOGRAPHIC CONSENT**

At our practice we sometimes use images of treatment to demonstrate to other patients the types of treatments available and the results which can be achieved. Patients find this very helpful when deciding which treatment option to choose. Your photographs are stored securely within your clinical records.

Below you can choose to opt in or out of use of your images

- I give consent for my photographs to be taken.
- I give consent for my images to be used in practice publications, brochures, display screens and on the practice website.
- I give consent for my images to be displayed on social media such as Instagram and Facebook.

YES

NO

If you would like to be tagged in your before and after photos on Instagram, please leave your username below @\_\_\_\_\_

*Thank You!*
