

# **Nutrition Myths**

## MYTH: You have to consume milk or dairy to meet calcium needs.

FACT: Plants are the original source of calcium, absorbing minerals from the soil.

Calcium and other minerals are found in the soil and are absorbed into the roots of plants. The calcium in cow's milk originates in those calcium-rich plants the cow eats.

Daily recommended amount of calcium is 1000mg for adults ages 19-50. The amount for women and ages outside this range varies.

98 mg **Soy Beans** Cooked, 1 cup

125 mg **Broccoli** Cooked, 2 cup

268 mg Collards Cooked, 1 cup

450 mg **Fortified** Almond Milk 1 cup

## MYTH: Carbohydrates are bad for you.

FACT: Your focus should be on choosing the right type of carbohydrate sources, not getting rid of carbohydrate foods altogether. Carbohydrates from vegetables, fruits, whole grains, beans and other legumes provide energy and essential nutrients like fiber, protein, vitamins, minerals, phytonutrients, and healthy fats. They're linked to lower risk of heart disease, cancer, type 2 diabetes, and other health conditions.

Carbohydrates are the body's preferred source of energy and the brain's only source of energy.

#### Steel Cut Oatmeal - 1/2 cup

Higher in fiber Higher in antioxidants Higher in potassium and calcium Higher in phytonutrients

Lower in sodium

# Plain Bagel - 1 large

Lower in fiber Lower in antioxidants Lower in potassium and calcium Lower in phytonutrients Higher in sodium

### MYTH: You need to eat animal protein to meet your protein needs.

FACT: Plant foods such as beans, lentils, nuts, and whole grains can provide ample protein for all life stages, as well as fiber and other essential vitamins, minerals, and phytonutrients not found in animal products such as meat, poultry, eggs, and dairy.
