CAGE/NCAGE: 9TDU5

By automating the Human Resources onboarding process of new employees, through Robotic Process Automation (RPA), you instantly:

✓ Save time by automating repetitive tasks such as data entry and document verification (**25% faster**)
✓ Increased efficiency, which allows the HR team to focus on more strategic activities such as employee engagement and development (**88% more efficient**)
✓ Improve employee experience by providing a smooth and well-organized onboarding process (**40% better employee experience**)
✓ RPA can help ensure compliance by automating the collection, validation and storage of documents (**55% compliance increase**)

RPA TEAM

80%   **20%**

Rapid Prototyping Team
RPT

Robotic Process Automation
Microsoft Power Platform

① 80% of our team spends 80% of their time on existing RPA processes and projects.

②
20% of the team spends 20% of their time on R&D for new technologies and new processes. This is our **Rapid Prototyping Team (RPT).** The RPT explores and validates emerging technologies, developing rapid prototypes that allow you to evaluate innovation opportunities with low risk and high return.

COOL TRICK

We allocate dedicated time for learning, encourage knowledge sharing, integrate learning into daily work, prioritize and delegate.

You now have a scalable and adaptable RPA team!
