Introduction

Welcome OVOonauts to reimagined EggPaper. We wanted a clearer, simpler and more direct whitepaper for those new to the XRPL, Crypto and to OpenEgg.

Our simple strategy is Opening Virtual Ownership to all and that is the idea behind the \$OVO token. We have a range of problem solve solutions that we are aiming to release in good time where \$OVO plays a key part.

We have initially set out a 4 stage plan to fully decentralise and utilise our utility token \$OVO. Having a widely decentralised token that was distributed freely on the open market, we felt was the best solution to mitigate any regulatory issues going forward.

Step by Step we will build a strong foundation that will continue to grow and flourish for years to come.

Decentralise and Utilise

Stage 1 - NFTs

3 OVOcard tiers with huge benefits and a route to Diamond NFT ownership. Passive NFTs can be redeemed using OVOcredits which will be a unique way to utilise \$OVO. Check out our Stage 1 LitePaper at <https://openeggovo.com/papers>

Stage 2 - Mini Games

All Minigames will utilise \$OVO creating a deflationary ecosystem and turn \$OVO into a utilised deflationary asset. Please check out <https://ovocrush.io/> for our first mini game. We also have our stage 2 Mini Game Litepaper available to view at <https://openeggovo.com/papers>

Stage 3 - \$OVO Redemption and Rewards

We will add redemption value to \$OVO in the form of a series highly planned and thoughtfully executed NFT collections including DoodleEgg, 0v0_NFTs and our collections. Everything we do and sell will be in \$OVO to add redemption value to \$OVO. We will also be adding Reward value to \$OVO in the form of the Egg Fund. Which will reward all top 100 holders with an equal share that will fuel the Incubator Liquidity.

ems

Stage 4 - EggFi

EggFi will include the Egg Fund, Incubator pools and a suite of financial items that will incentivise \$OVO use, \$OVO volume and \$OVO ownership on the XRPLedger

OVOcard NFTs

Reward bundles to kick start your Egg Eco ownership

Giga OVOcard

Mintage: 33 | Price: 499xrp

- 18M \$OVO
- 10 OVOcredits
- 10 DoodlEgg NFTs
- 1000xrp Sell Out Draw
- Route to Diamond OVOcard
- Physical OVOcard
- Personalised PFP NFT
- Discounted Items

20% OFF

Mega OVOcard

Mintage: 99 | Price: 249xrp

- 9M \$OVO
- 7 OVOcredits
- 5 DoodlEgg NFTs
- 1500xrp Sell Out Draw
- Route to Diamond OVOcard
- Physical OVOcard
- Personalised PFP Drops
- Discounted items

20% OFF

Micro Egg NFT

Mintage: 299 | Price: 58xrp

- 1.5M \$OVO Allocation
- 4 OVOcredits
- 1 DoodlEgg NFT
- 1000xrp Sell Out Draw
- Diamond OVOcard per 55 sold
- Physical OVOcard per 30 sold
- Personalised PFP Drops

\$OVO TOKEN

\$OVO Token

No \$OVO has or will be sold by the team to fund OpenEgg Developments and all OpenEgg Wallets are on website with links to XRPscan for checking.

We have created a deflationary asset that will be utilised in all our developments and remember the first 4 stages are simply to decentralise the token and build a foundation that will propel us into our problem solve solutions, be ready for that!

Currently used to purchase NFTs, trade NFTs and to play OVOcrush. There is also a large reward distribution at maturity to \$OVO holders through our Incubation OVOnaut Schemes that brings massive value onto the ledger and into the \$OVO holders.

There are features being worked on to allow \$OVO to be used within the Incubation centre, within our additional games and NFT trading game. Our solve solutions will bring a huge use case to \$OVO through the unlocking of hooks, pools and DeFi Incubators. These will sustain high trading liquidity and a utilised demand for \$OVO like never seen before.

NFT Sale Allocation

We have allocated the following %'s to maximise OpenEgg development

50% Development

Used to develop the Egg Eco including metaverse store and associated EggFi builds

25% Egg Fund Input

We purchase and manually balance a suite of crypto currencies and tokens to build up a fund that we will then distribute to \$OVO holders via a \$USD airdrop through the Incubators in the form of an LP token for you chosen pool

10% \$OVO Growth

Rewards, engagements and challenges to sustain the social growth and \$OVO floor level

10% Diamond OVOcard

10% of monthly NFT sales to be distributed to Diamond NFT holders, amount of winners dependant on funds raised.

5% Buy back \$OVO

The buy back allocation will be split 50/50. Half will be sent to the incenerator to be burnt to take tokens out of circulation and the other half will be donated to future partners and projects.

Roadmap

Currently we have chosen to not identify keys dates or milestones, we feel we are more than comfortable with the work that we are currently doing behind the scenes and have extreme confidence in being able to bring to market everything we have said, planned and discuss in our telegram

If you would like to find out more about when and what we have coming please feel free to join and discuss within our telegram <https://t.me/OpenEgg>

You will be surprised with what we have coming and how we intend to create a self sustaining, passive earning and utilised \$OVO ecosystem built on the XRP Ledger

XRPL INcubators

Our first problem solve will be to enable an easy route to a mix of tokenised asset exposure, all on the XRP Ledger. We have highlighted the utilised roles that the DoodEggs will hold within the OpenEgg ecosystem.
