OpenEgg

Powered by \$OVO

Welcome OVOnauts to our first LitePaper. For each of our 4 initial stages we will be producing a separate paper, which goes into details and highlights the key information for members. We also intend to shed light on the direction that we are aiming for.

Introduction

OpenEgg has 4 key stages, all integrating \$OVO, throughout 2023

- Stage 1 - NFTs
- Stage 2 - Mini Games
- Stage 3 - Incubation Centre
- Stage 4 - Immersive NFT trading game

Each stage will enable us to build a consortium of contacts with developers, artists and XRPL members.

We feel our business and project management experience will be a valuable commodity that we will be looking to maximise, through smart networking, providing value, and developing working relationships through our use of "OVOscheme". This will fit into our Web3 marketing and business management plan that will be providing services to artists, businesses, and projects. Then moving onto our NFT "OVOcode" development, utilising and maximising the decentralised nature of \$OVO

2023 Targets

- Fully decentralise \$OVO
- Complete 4 stages of development
- Maximise every avenue for OpenEGG growth
- OVOscheme and OVOcode

Through our OVOcodes:

- Onboard Artists
- Onboard Projects
- Onboard Businesses

Eggs

What? Why? Where?

What?

We have created 3 purchasable Easter Egg NFT Tiers and 1 Rewardable Diamond Egg NFT

Why?

We wanted to create an easy and simple way for community members to enter in and incentivise the OpenEgg Ecosystem. We also want to fully decentralise \$OVO and by rewarding NFT owners, we feel this is a great way to do this.

Our Easter Egg NFT Tiers will fundamentally be the lifeblood of the OpenEgg ecosystem and the funds generated will be allocated to maximise growth, maintain \$OVO value, and to help bring in self generated external value onto the XRPL.

We want our Easter Egg Tier holders to benefit from everything we do and on the following pages you will see the benefits that can be received from being a holder.

These are the first example of NFTs that can have a variety of benefits and rewards. Not just a normal nft, not just your normal reward and not just your normal project. OpenEgg powered by \$OVO

Where?

On the XRP Ledger and minted on Radical X.

Issued token utility and opening up the XRPL for mass onboarding.

<https://www.radical-x.io/ropenegggoRxjNSqD5jguKqbCiBDzpM9Xk>

openeggovo.com

OpenEgg NFTs

Our collections range from:

- Mainstream favourites with an OpenEgg Twist
- A Phygital PDF book - Rewarded with a signed copy by the Author
- Ai, Handrawn, 3D, 2D, Generative, Gamified and Event (B2E)
- Variety of bonuses including the DoodlEgg Double Down collection
- External Artists
- Fractionalised Ownership

These will all be minted by OpenEgg using the "ropeneggRx..." issuer account and Easter Egg owners will be able to choose which NFTs they would like. Giga Holders can request personalised varieties from our NFT collections if they wish to complete the online request form (Coming soon).

OVOcodes and OVOschemes will open up a gateway to onboard artists, projects and/or businesses that see value in what we can offer.

We can help through the creation, marketing, and business management side of your project or collection. Our costs are on a "quid pro quo" basis as the overall health of the XRPL space is at the top of our priority list and where we feel we can add value we will. Although we have just started you will soon see the effort and commitment we will bring to the space.

Sale Allocation

Our mission is Opening Virtual Ownership and we will be integrating our utility token, \$OVO, into all our developments and innovating utilised roles for NFTs in all that we do. Ranging from images, books, burn to earns, discount codes, music, and even contractual work agreements. This is will allow for greater transparency and organisational structure, by utilising the power of NFTs on the XRP Ledger. We have allocated the following %'s to maximise OpenEgg development and all will be **powered by our utility token \$OVO**.

50% Development

Used to develop our 4 stages and then to initiate OVOschemes and OVOCodes to bring utility to the token and enrich the OpenEgg ecosystem.

25% Incubation OVOnaut Scheme

Select utility projects, going through regulatory compliance/real world partnerships, with a huge ROI and exit at pre-selected price targets and distribute to \$OVO holders. Bringing in value to the XRPL to enhance the space. This is what we are passionate about and are always free in our telegram to help encourage smart research and strategies.

10% Sell Out Bonus Draw

All collections, once sold out, will have a 10% draw to be rewarded at random to 5 lucky winners.

10% Diamond Holders

10% of monthly NFT sales to be distributed to 5 lucky Diamond NFT holders.

5% Buy back \$OVO

Use funds to set buy limit orders to add depth to the book and then deflate the supply
