OVO CRUSH

BY OPENEGG ON THE XRP LEDGER

Welcome OVOonauts to our first mini game

OVOcrush built on the XRP Ledger | OpenEgg powered by \$OVO

Introduction

OVOcrush is an OpenEgg twist on an absolute classic! There are 16 highly addictive levels, each with different tasks and challenges for you to play through. Bringing utility to \$OVO and turning \$OVO into a deflationary asset! Our mini games, in the future, will be merged in our OpenEgg App Platform as a consortium of P2E games to compliment our problem solve solutions that we are working towards in order to bring value to the XRP Ledger and build utility within our \$OVO ecosystem

How To Play

Once you click play, the game starts, you will need to beat the target score, and crush more eggs than required. You will also have to crush the target blocks and additional challenges along the way. All that within the chosen time and selected amount of turns!

You can move by clicking on an egg and then a clicking on an adjacent egg next to it. This then performs a swap, but you are only able to do this if this creates 3 or more matching eggs in a row

You will need to get 3 in a row to "crush" them. 4 in a row gives you a bonus and if you get 5 in a row you get the PowerBall Bonus. To help with the missions we have given an overview of all bonuses below!

"This Is One Tough Egg To Crack!"

In Game Bonuses & Targets

PowerBall Bonus

Achieved: Crushing 5 eggs in a row!

Bonus: Swap with any egg and all matching eggs are instantly crushed!

Flame Bonus

Achieved: Crush 4 eggs in row!

Bonus: Swap with an egg and all eggs in that line are "flashed". The direction of the flashing flame determines if it will flash up/down or sideways!

TNT Bonus

Achieved: Crush combos

Bonus: When swapped blows everything up around it.

Wallet Target

Aim: Crush the egg inside by linking a combo, can be swapped

Issue: Some wallets need 3 attempts to open them

Tip: TNT takes them out quickly

Rocket Target

Aim: Crush eggs next to them to take them out

Issue: They start coming back if you are not quick enough

Tips: Try to get a parallel crush combo (Takes more out)

Jail Target

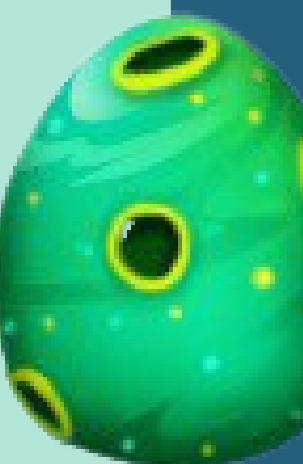

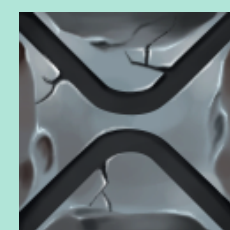

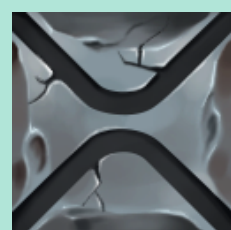

Aim: Crush the egg inside! Egg cant be swapped only linked.

Issue: Egg is locked in and needs to be linked to crush it.

Tips: Get a powerball and crush the eggs in jail easily!

Blockers - Big pain! Cant Move! Wont Move!

Asteroids & XRP Blocks- These are a pain in the arse! Can't go through them, can't destroy them and the only way is to work your way around them and plan a route to complete tasks

DECENTRALISE DEFLATE UTILISE

Initial 4 Stages of development and then working towards a sustainable and profitable, problem solve we have labelled as OVOcode!

Stage 1 - NFTs

Easter Egg Tiers with a wide variety of rewards which include monthly \$OVO rewards, Diamond NFT, OVOcredits that enable rewardable NFTS to be claimed on Radical X and an early introduction into NFTs with utility

Stage 2 - Mini Games

A series of Mini games that bring fun reward systems for redistributing NFTs, NFT sales and OVOcredits. Adding \$OVO utility while also recycling profits and creating a deflationary asset.

Stage 3 - Incubation Centre

Based on the XRPL, this space will be a shop, education centre and OVOnaut development centre. Bringing utility to \$OVO in a educational, reward and liquidity providing space.

Stage 4 -NFT trading game

Linking OVOnauts and NFTs into a competitive environment, which will bringing utility to all our NFTs and linking them to the future solves
