OpenEgg
Powered by $OVO

Welcome OVOnauts to our second LitePaper. For each of our 4 initial stages we will be producing a separate paper, which goes into details and highlights the key information for members. We also intend to shed light on the direction that we are aiming for within this stage

Introduction
OpenEgg has 4 key stages, all integrating $OVO, throughout 2023

OVO CRUSH
BY OPENEGG ON THE XRP LEDGER

Stage 1 - NFTs
Stage 2 - Mini Games
Stage 3 - Incubation Centre
Stage 4 - Immersive NFT trading game, MMORTS

Each stage will enable us to build a consortium of contacts with developers, artists and XRPL members. As we continue on our journey to bring awarness to the XRP Ledger, NFTs and to OpenEgg.

Decentralise | Utilise | OVOcredits | Integration | Deflationary Asset

2023 Targets

- Fully decentralise $OVO
- Complete 4 stages of development
- OVOscheme and OVOcode
- OVO_____ - A utility we are currently discussing

OpenEgg Vision:

- Create a series of sustainable business models that brings NFT & token utility to the XRP Ledger

Mini Games
What? Why? Where?

What?

We will create 3 mini games where they get progressively more complex and integrated with our XRP Ledger NFTs

Why?

We want to take the necessary steps towards our problem solve solutions and it seems only fitting to start with a few mini games. These will help us build contacts with developers, gain an understanding of the xrpl and give us the foundation in which to develop further into more complex developments in the future

Our mini games will not only bring a utilised role to $OVO but $OVO will become a deflationary asset where 90% of income from the mini games is burnt, the remaining 10% is distributed to the Diamond NFT holders via the "Diamond Drip".

We will also use these mini-games as a Play 2 Earn. Where the prizes will be our unique range of utilised NFTs, external project tokens and part profits from our NFT sales. We will also be giving away non-XRPL tokens to help bring in members from external chains and projects into the XRP Ledger Family

Where?

Our website is openeggovo.com and links, guidance and our "How To Play" will be easily accessible for all.

The links will be available on all our social feeds and in our telegram.

Open Egg

Mini Games

There will 3 mini games in total and the first offical game is called OVOcrush, the second 2 will go out to be named by the community themselves where the chosen winner will be awarded an in game prize.

OVO CRUSH

BY OPENEGG ON THE XRP LEDGER

A candy crush style game with an OpenEgg twist. You will be able to purchase OVOcredits (lives) using $OVO and then proceed to play 16 fun levels. The aim will be to achieve a top 25 score in order to r3ceive part of the prize pool and a DoodlEgg. With huge fiat prizes for finishing in the selected positions in our gaming quarters we expect a very competitive period. This will help to deflate, decentralise and utilise our in-house utility token $OVO. Additional bonus levels will be linked through all 3 games that will be required in a multigame tournament on completion of our compendium of mini games. All will eventually be moved into our OpenEgg App and turned into Play 2 Earn games once capability on the network is achieved.

Our 2nd and 3rd Mini Game information will come out in due course but will include incubation style themes and our UE5 OVOnaut Avatar.
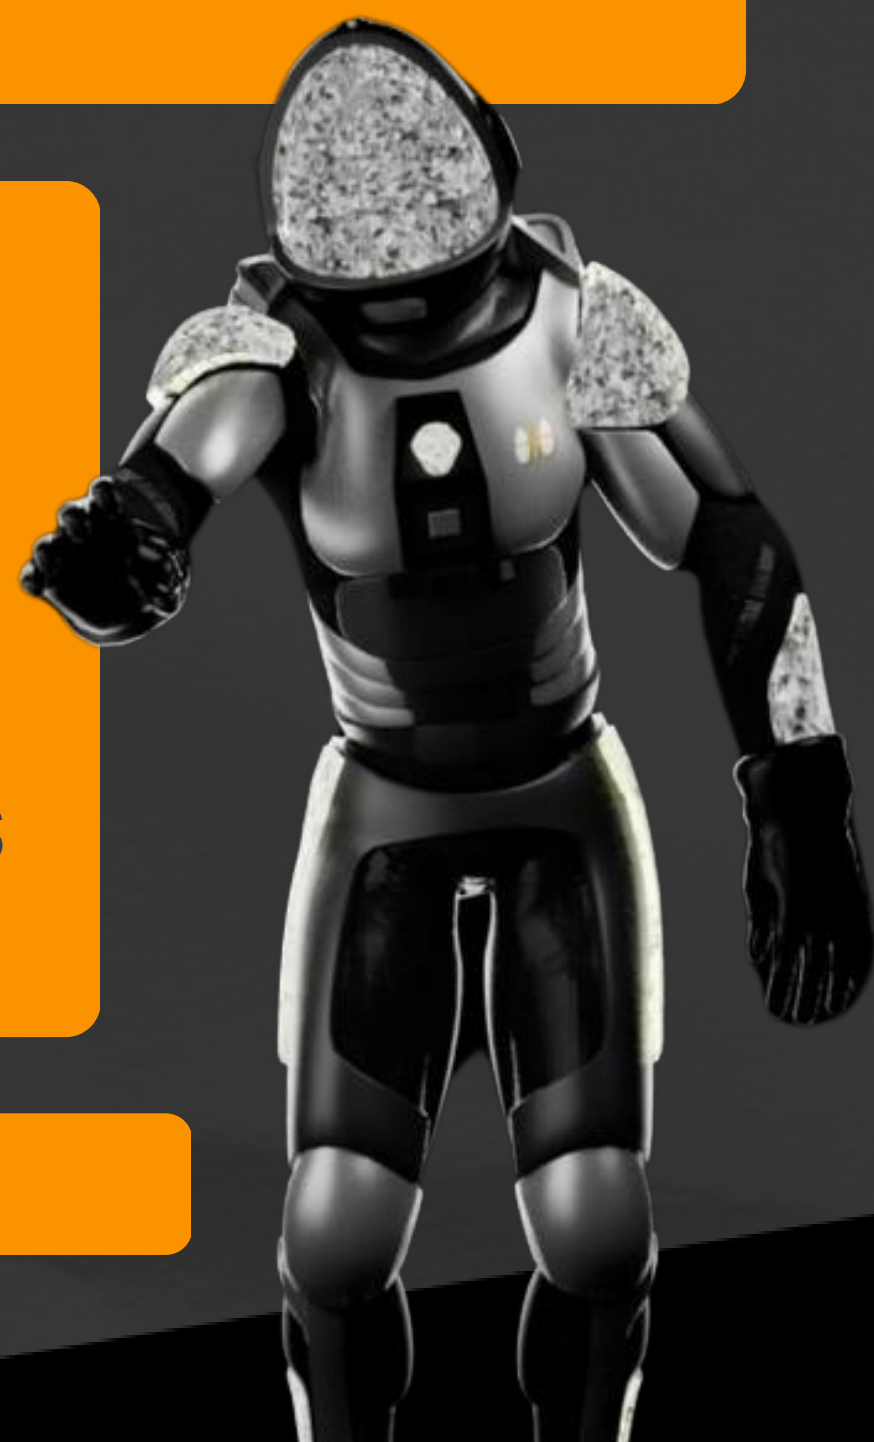

OVOcrush lauches

Q2 2nd Mini Game

Q3 3rd Mini Game

Q4 NFT Trading/Competitive MMORTS

Mini Game Rewards

Fee Structure:

Although the fee structure and cost to play will vary from game to game and bonus to bonus. Our core principle will be an extremely low cost $OVO payment to initiate the game. We plan to reward to gamers with fiat and DoodlEggs and additional rewards will be a variety of XRP, fiat, external tokens and NFTs as a reward structure.

So if you are a gamer you can begin your $OVO journey by being a top gamer and earning a DoodlEgg, then that DoodlEgg winning you an Easter Egg and before you know it you will climb the OVOnaut ladder.

Mini Game Structure:

75% Burnt   15% P2E ♻️   10% Diamond Drip

Low cost $OVO for OVOcredits

DoodlEgg and NFT additional Rewards

Huge Fiat reward pool!

External Project Tokens/NFTs in exchnage for OVOwatch content

Decentralise   Deflate   Utilise

OpenEgg
Powered by $OVO

Decentralise Deflate Utilise

Stage 1 - NFTs

Easter Egg Tiers with a wide variety of rewards which include monthly $OVO rewards, Diamond NFT, OVOcredits that enable rewardable NFTS to be claimed on Radical X and an early introduction into NFTs with utility

Stage 2 - Mini Games

A series of Mini games that bring fun reward systems for redistributing NFTs, NFT sales and OVOcredits. Adding $OVO utility while also recycling profits and creating a deflationary asset.

Stage 3 - Incubation Centre

Based on the XRPL, this space will be a shop, education centre and OVOnaut development centre. Bringing utility to $OVO in a fun, educational and motivational space.

Stage 4 - Immersive NFT trading game

Linking OVOnauts and NFTs into a competitive environment, which will bringing utility to all our NFTs and linking them to the future solves
