

AUTTECS
AUTOMATION & TECHNOLOGY SOLUTIONS

INDUSTRIA
5.0

INDUSTRY 5.0

Sustainability

Understood as effort to reduce the carbon footprint, promote circularity and the incorporation of production systems based on renewable energies.

Empowerment of the individual,

To treat human and fundamental rights as a priority, for example with the General Data Protection Regulation, and for workers to benefit from the digital transition and

Resilience

Seen as the ability to adapt to difficult economic and community situations, and to take action for a recovery based on green, digital and social priorities.

INDUSTRY 5.0

SERVICES WE OFFER

- Intelligent Automation
- Internet of Things (IoT)
- Data Analytics and Big Data
- Mass Customization
- Sustainability
- Human-Robot Collaboration
- Augmented and Virtual Reality
- Cybersecurity
- Predictive Maintenance

These services seek to improve the competitiveness, adaptability and sustainability of companies in an increasingly and dynamic production environment.

INTELLIGENT AUTOMATION

Implementation of robots and automation systems that work alongside humans to improve efficiency and accuracy in production

AUTTECS
AUTOMATION & TECHNOLOGY SOLUTIONS

INTERNET OF THINGS

IoT offers continuous monitoring, remote control, predictive maintenance, and data-driven decision making. It is applied in industries such as manufacturing, healthcare, smart cities, and homes, generating increased productivity, cost reduction, and new opportunities for innovation.

Connect your operations. Control your results.

AUTTECS
AUTOMATION & TECHNOLOGY SOLUTIONS

DATA ANALYSIS AND BIG DATA

- Use of analytics tools to interpret large volumes of data, optimize processes, and make informed decisions

AUTTECS
AUTOMATION & TECHNOLOGY SOLUTIONS

MASS CUSTOMIZATION

- Ability to mass-produce customized goods, adapting to specific customer needs

AUTTECS
AUTOMATION & TECHNOLOGY SOLUTIONS

SUSTAINABILITY

- Implementation of practices that reduce environmental impact, such as circular economy, efficient use of resources and waste management

AUTTECS
AUTOMATION & TECHNOLOGY SOLUTIONS

HUMAN-MACHINE COLLABORATION

- Development of work environments where humans and robots collaborate, improving ergonomics and safety at work

AUTTECS
AUTOMATION & TECHNOLOGY SOLUTIONS

AUGMENTED AND VIRTUAL REALITY

- Use of immersive technologies for equipment training, design, and maintenance, improving user experience and staff training

AUTTECS

AUTOMATION & TECHNOLOGY SOLUTIONS

CYBERSECURITY

- Protecting critical systems and data from cyber threats, ensuring information integrity.

PREDICTIVE MAINTENANCE

- Implementation of technologies that allow equipment failures to be anticipated, reducing downtime and maintenance costs
