# 2026 PERIMETER HEALTH CHECK

*"Breach yourself before someone else does"*

## **ARE YOU AN EASY TARGET?**

Most breaches don't happen through complex zero-day exploits; they happen through neglected security fundamentals. This diagnostic tool identifies the "low-hanging fruit" that hackers look for first. Score yourself honestly to see where your defenses stand.

# The Scorecard

---

Mark [YES] or [NO] for each item. One point for every 'YES'.

## PILLAR 1: ACCESS & IDENTITY

**1. Is MFA mandated for ALL corporate accounts (Email, VPN, Cloud)?**

YES  NO

**2. Is access instantly revoked via a formal offboarding process?**

YES  NO

**3. Are admin credentials stored in an encrypted vault (not browser/docs)?**

YES  NO

## PILLAR 2: INFRASTRUCTURE

**4. Are critical patches applied within 48 hours of release?**

YES  NO

**5. Do you have a real-time, automated inventory of all network devices?**

YES  NO

**6. Are backups air-gapped or immutable to prevent ransomware encryption?**

YES  NO

## PILLAR 3: HUMAN DEFENSE

**7. Have employees had a phishing simulation in the last 90 days?**

YES  NO

**8. Is there a tested Incident Response Plan updated in the last 12 months?**

YES  NO

# Your Risk Profile

---

Total your "YES" answers and find your profile below:

## 7-8 YES: HARDENED PERIMETER

You have a solid foundation. You are ready for advanced Red Teaming to find deeper logical flaws and lateral movement risks.

---

## 4-6 YES: ELEVATED RISK

You have "open windows." A moderately skilled attacker could likely gain persistence in your network within hours of entry.

---

## 0-3 YES: CRITICAL VULNERABILITY

You are currently an easy target. Immediate remediation is required to prevent a catastrophic breach of data or operations.

---

## NEED A PROFESSIONAL BREACH SIMULATION?

A self-assessment finds the holes you know about.  
**We find the ones you don't.**
