

AUSTRALIAN INDIGENOUS LAND PROTECTIVE SERVICES

FUELING COMMUNITY GROWTH & RESILIENCE

2025

CAPABILITY
STATEMENT

Our Mission:

Small teams, big impact—making a difference where it matters most. Australian Indigenous Land Protective Services (AILPS) has a focus on fire management, forestry, and building community resilience, our mission is to deliver adaptable solutions that drive community growth and development.

Our Approach: Building Local Capacity

Project Development

- Opportunity Discovery: Identifying and unlocking growth opportunities for Indigenous communities.
- Project Planning: Developing tailored, comprehensive plans aligned with local priorities.
- Feasibility Studies: Evaluating the viability and sustainability of proposed initiatives.

Capacity Development

- Partnership Building: Creating collaborative relationships to amplify impact and resources.
- Education & Skill Development: Equipping communities with the tools and knowledge to drive their growth.

Our services are designed to empower indigenous communities, government agencies, and other organizations by delivering innovative solutions that streamline processes, unlock resources, and build strong partnerships. With our years of expertise across various industries, we understand the unique challenges and obstacles that can limit growth potential for both indigenous communities and their agencies.

Our Services

Emergency Management Services

- **Fuel Mitigation:** Reducing fire hazards through strategic vegetation management.
- **Fire Suppression:** Rapid response to wildfires, protecting communities and resources.
- **Training:** Building local capacity with specialized fire and emergency training programs.
- **Cultural/Prescribed Burning:** Integrating traditional knowledge for sustainable land management.
- **Risk Assessment:** Identifying and mitigating fire risks in vulnerable areas.
- **ISO Standards:** Ensuring adherence to international safety and quality standards.
- **Flood Mitigation & Response:** Training and deployment for flood response and risk reduction efforts.
- **Recovery Services:** Helping communities rebuild and restore after disasters.

Forestry Services

- **Biofuel Production:** Harnessing natural resources for renewable energy.
- **Consulting:** Expertise in sustainable forestry practices.
- **Sustainable Harvesting:** Implementing eco-friendly logging practices.

Carbon Management:

- **Project Development:** Creating and managing carbon offset programs.

Resource Management

- **Resource Planning:** Sustainable use of natural resources to ensure long-term viability.

Mining Support Services

- **Fire suppression and fuel mitigation** tailored to mining operations.

Heavy Equipment Services

- **We have a wide range of heavy equipment and trained operators available for all projects.**

Project Planning & Partnership Development

- **Strategic Planning:** Support projects by setting clear goals, aligning resources, and building partnerships that leverage expertise and deliver shared benefits.
- **Opportunity Identification:** Evaluate collaboration, funding, and market opportunities to ensure projects align with community needs and long-term goals.
- **Proprietary Technology:** advanced software tools for funding insights, streamlined proposals, and resource optimization.
- **Capacity Building:** Equip organizations with tools and guidance to enhance operations and engage in sustainable development initiatives.
- **Networking:** international relationships between Canadian and Australian Indigenous groups, fostering cultural exchange and traditional knowledge-sharing.
