

WALKER BAG – INSTRUCTIONS

Supplies

*Fabric – heavy cotton or similar, 2 pieces of coordinating fabric, 44-45” wide, 15-18” strip

*Velcro – sew-on (not stick-on), 2 sets cut to 3-1/2” long (hook & loop sides)

(you may want to adjust size slightly to fit a specific walker)

Instructions

1. Cut two pieces of fabric in coordinating colors/patterns; one is “feature fabric” & will show most on outside/pockets.
2. Pin together & sew two pieces, right sides together, 1/2” seam. Leave 5” opening along a long side, but not in the center. Always backstitch.
3. Clip corners, turn right side out, iron all edges out well.
4. Top stitch 3/8” short ends of fabric.
5. With feature fabric facing UP, mark center with pins or chalk. Pin on Velcro tabs (see Fig. 1); heavy pins work. Place hook velcro on left, loop velcro on right – one set at the top and one set at the bottom. Pin 1-1/2” from top/bottom, and 5” from center of fabric. Sew all the way around each of the 4 velcro tabs.
6. With feature fabric facing DOWN, fold in the ends of fabric to 4-1/2” from center, so the gap will be 9” (see Fig. 2).
7. Sew along each LONG side 3/8” (this will close the opening used to turn the fabric).
8. Stitch a center seam thru one end to form two pockets on one side.
DONE!
