PRODUCT RANGE

The world is grappling with an unprecedented crisis. The focus remains not only on controlling the spread of Covid-19, but on ensuring the safety of those who are working at the frontlines of the pandemic to contain it and those whose livelihoods have been severely impacted by it.

At Lupin, we are moving ahead with a clear strategy of safety and preparedness. At the onset of the crisis, we set up a centralized 'Covid-19 Taskforce' to monitor the situation daily and put in place adequate safeguards to ensure the health and safety of our employees, develop a business continuity plan, and support the communities we operate in.

All our factories have been maximizing the production of life-saving drugs to ensure that despite the ongoing crisis, our drugs remain available for our communities around the world.

Our Supply Chain team is taking all appropriate actions to ensure that any disruption is minimal and we continue to function regularly during this uncertain time.

The fact remains that this is a complex situation where despite our best efforts, we all face an uncertain tomorrow. You have our promise that we remain committed to providing you with access to quality healthcare at an affordable price.

LUPIN

Mr. Nilesh Gupta

Chair Quality Forum, IPA and Managing Director, Lupin Ltd

"We are proud to be based out of India; and as we have shown during the COVID-19 pandemic, we are truly the pharmacy of the world. Our actions are in line with responsible market leaders. When it comes to quality, while there is considerable improvement, there is more work to be done. For this, the theme of the forum continues to be patient centricity - we firmly believe that keeping patients front and center is not just critical, but will also enable us to rise to be the global benchmark in quality and compliance."
