

VIVA WELLNESS CO.

CONCIERGE TELEHEALTH

PEPTIDES | TRT | HRT | WEIGHT LOSS

WEIGHT LOSS

Initial consult required. GLP-1 medication, supplies, home delivery, and ongoing provider consult included in cost.

Semaglutide

GLP-1 medication for appetite regulation.

Delays gastric emptying, reduces cravings, and supports significant fat loss while improving blood sugar control.

200.00-300.00/month

Tirzepatide

Dual-action GLP-1/GIP for enhanced metabolic impact.

Reduces appetite, improves insulin sensitivity, and promotes greater weight loss than semaglutide alone.

300.00-450.00/month

Phentermine

Appetite suppressant and energy booster.

Stimulates metabolism and curbs hunger to kickstart fat loss—ideal for short-term use with lifestyle changes.

100.00/consult and 30-day prescription to retail pharmacy.

Alternative compounded phentermine, bupropion, naltrexone, metformin and more combinations also available starting at 150.00/ 30-day supply.

PEPTIDES

CJC-1295 / Ipamorelin

Supports natural growth hormone release.

NAD+ HOME INJECTION KIT

Nicotinamide adenine dinucleotide (NAD+) is a vital coenzyme found in every cell of the body. It supports:

Cellular energy production (ATP)
DNA repair and longevity
Neuroprotection & cognitive benefits
Detoxification & metabolic function
Improved mood & sleep regulation
Reduction in inflammation & oxidative stress

Why Choose Home Injections Over IV Therapy?

- More affordable and sustainable
- Easier to maintain long-term consistency
- Lasting results without the high cost or inconvenience of IV infusions

Home Injection Kit Includes:

NAD+ in pre-mixed, subcutaneous formulation
Supplies for easy self-administration
Personalized dosing guidance
Optional lab monitoring
Delivered to your door

1,000mcg vial 350.00

2,000mcg vial 500.00
