

Heartsaver® Pediatric First Aid Skills Testing Checklist

Student Name _____ Date of Test _____

Scenario: "EMS has arrived and takes over. You may now remove your gloves. Demonstrate what you would do next."

Removing Gloves

- Grips one glove on the outside, near the cuff, to peel it off
- Cups the inside-out glove with the gloved hand
- Places 2 fingers of the bare hand inside the cuff to peel the second glove off, with the first glove inside it
- Verbalizes the need to dispose of gloves properly

Scenario: "You find a child lying on the floor. There are a phone, first aid kit, and AED on the wall. Demonstrate how you would find the problem."

Finding the Problem

- Verbalizes that the scene is safe
- Taps and shouts*
- Shouts for help/Phones 9-1-1/Gets first aid kit and AED
- Checks breathing†
- Looks for injury and medical information jewelry‡
- Verbalizes that he or she will stay with the child until EMS arrives

*After the student taps and shouts, the instructor says, "The child is unresponsive."

†After the student verbalizes that he or she has checked for breathing, the instructor says, "The child is breathing normally."

‡After the student checks for injury and medical information jewelry, the instructor says, "The child is not injured, and there is no medical information jewelry."

Scenario: "You will demonstrate stopping bleeding and then bandaging a small cut on the child's forearm. You have the first aid kit and are now ready to begin."

Stopping Bleeding and Bandaging

- Tells child to place pressure over cut with clean dressing
- Verbalizes putting on gloves
- Applies pressure to bleeding area*
- Adds more dressings and presses harder†
- Applies more bandages over the dressing

*Instructor says, "The bleeding is not stopping."

†Instructor says, "The bleeding has stopped."

Scenario: "A child has a severe allergic reaction, has an epinephrine pen, and needs help using it. You have completed all previous steps and are now ready to use the epinephrine pen. Demonstrate what you would do next."

Using an Epinephrine Pen

- Holds epinephrine pen in fist
- Takes off safety cap
- Presses epinephrine pen firmly against outer side of thigh for 10 seconds
- Removes epinephrine pen
- Rubs injection site for 10 seconds

STOP TEST

Instructor Notes

- Place a ✓ in the box next to each step the student completes successfully.
- If the student does not complete all steps successfully (as indicated by at least 1 blank check box), the student must receive remediation. Make a note here of which skills require remediation (refer to Instructor Manual for information about remediation).

Test Results Check **PASS** or **NR** to indicate pass or needs remediation:

PASS

NR
