

Presenting

ANALYTIC BASEBALL

Playing Baseball by the Percentages!

Dear Fellow Baseball Enthusiasts:

Analytic Baseball is a competitive statistic-driven skill and luck digital baseball game that simulates an actual MLB game. The game is played with four dice that is rolled and the total indicates the result of each **pitched ball** (by the pitcher) or **swing at pitch** (by the batter).

Clutch hits and excellent pitching win games in Analytic Baseball just like in the big leagues. It's all here. A player's influence on the percentages involving balls, strikes, hits, and outs, double plays, stolen bases, foul balls and errors determines whether they wind up last place or go to the World Series.

The game's essence is its inclusivity. Whether you currently run the bases or have a physical disability. Whether you're a seasoned baseball fan or new to the sport, Analytic Baseball welcomes you with open arms!

ANALYTIC BASEBALL WILL BE MADE AVAILABLE FREE OF CHARGE TO NON-PROFIT ENTITIES THAT PROMOTE ITS USE.

Your help is needed. The game is developed and ready for trials. I need volunteers to participate as a competitive player and/or observer. We want your feedback! A hands-on exhibition game demonstration in a public venue will be scheduled soon.

This pilot project needs your help. To get involved please register below to receive email notification for a future scheduled meeting date and time.
