31.91

Summary: This cross incorporates 17 documented founders (16 wild/1-F1) including Karl Switak's captured gravid female featured in the April & May 1995 Reptiles Magazine as well as the original wild pair Trooper Walsh bred back in 1976. It also includes the AI Zulich pairing of the "004 AZ" & "47 LR Wild Blue" animals which were responsible for major contributions to the original blue lines including the prolific blue producing-females Joan Collins (30.93), TMBF (48.93), & Powder (47.93).

Other highlights of this cross include the legendary "Ole Yeller" which came out of a litter of screaming tri-color chondros of Biak descent. This cross has links to the original blue male "Mr Blue" (18.96) as male 8.96 was a littermate. Both were products of the TMBF x "Legend" pairing done back in 1995 by Tim Morris. This male (8.96) was later crossed to an F1 (Blue) Sorong type to produce another notable blue female named "The Gordon Blue Female" in honor of Steve Gordon a local MD breeder whose life ended prematurely when he was hit by a car while riding his bike. Finally, this bloodline incorporates "Blue Deuce" which came from arguably one of the best crosses ever done – TMBF x Daddy Pants. This cross was thought by many to have produced the largest number of high end animals in one litter.
