

# VK Integrated Systems SmarTak™ SIOS-C11B

**SmarTak™ Integrated Overmatch Stock (SIOS)** is a line of rifle stocks with SmarTak™ inside. The SmarTak enabled SIOS-C11B is an enhanced buttstock with electronics, capable of analyzing user motion and transmitting to an Android device. SIOS-C11B is suitable for work in the field or training, offering the benefits of elegantly simple design features and ergonomic curves.

The VKIS SIOS-C11B models serve as a drop-in MIL-SPEC replacement buttstock for rifles using an AR-15 type MIL-SPEC sized receiver extension tube. The 9-DOF IMU and GPS inside the stock communicate to an Android device, passing location, orientation, and status to everyone in the group.

Features include Rear push-button QD swivel sling mount accommodates up to 1.5" swivels (ambidextrous). Length of pull 14.10 in. (extended) and 10.80 in. (collapsed). With QD sling mounts accept any push-button sling swivel and an ergonomic pull tab that allows for quick deliberate action while preventing snags and unintentional activation.

SmarTak™ is an advanced weapon system design for real-time "battlespace awareness." Installs in under 60 seconds and transmits location, orientation and status of the weapon.

For more information, visit  
[www.vkintsys.com/smartak](http://www.vkintsys.com/smartak)

Advanced sensors capture real-time telemetry and increase situational awareness. The status of the weapon is continuously monitored and transmitted to your team for full weapon orientation and Geolocation support.

## SIOS-C11B Specifications

Price	\$399.99
Electronics	Yes
Platform	AR15, M4, AR10, M110, SR25
Compatibility	MIL-SPEC receiver extension
Weight	16.16 oz.
Length	7.00 in.
Width	2.73 in.
Color	Black
Sensors	9-DOF IMU GPS w/ 2m CEP Shot detection
Capture	Shot count Rifle orientation Maintenance log
Data-link	900MHz mesh net Bluetooth
Battery Capacity	7000mAh
Battery Life	Up to 24 hours
Charge Interface	USB Type C
Environment	Ip67 rated
App Support	InForce
Accessories	USB charger USB-C cable
