

## ABOUT

CyberCare Professionals connects clients with experienced, certified professionals across technology, operations, and specialized business functions. With deep experience across government and commercial sectors, services are delivered through a disciplined, engagement-based approach aligned to client needs and execution requirements. Capabilities support workforce augmentation, professional services delivery, and engagement-based delivery models—ranging from single-role placements to scaled workforce solutions—designed to help clients execute effectively and achieve measurable outcomes.

## CORE CAPABILITIES

Backed by leadership with more than 30 years of experience across government and commercial sectors, CyberCare Professionals delivers professional services and workforce solutions across cybersecurity, information technology, governance, and program and project management. Delivery is supported through third-party hosted solutions operating within FedRAMP-authorized cloud environments, enabling the secure handling of government-related data in accordance with applicable federal security requirements. The core capabilities below reflect areas of proven expertise that enable disciplined, reliable delivery across engagements.

- Cybersecurity and risk-focused services
- Information technology and systems support
- Network and systems administration
- Program and project management
- Operations and logistics support
- Manufacturing and engineering services
- Human resources and talent acquisition
- Governance, quality, and risk management
- Change management and organizational support
