FRANCHISE PROGRAM OVERVIEW

**Feet on the
Ground.
Eyes to the Sky.**

On-Side Construction has set the bar for utilities construction installation. We have earned the trust of national carriers and look forward to introducing our new franchise owners to our already existing accounts.

We've laid the groundwork for you, now it's your turn to dig deeper.

Driven by Potential

The hours we spend working underground, in the air, and in the dirt, bring endless possibilities to the world around us. A path for technology. A river of energy. Copper and fiber optics. Water and gas and light. There is an immense web of communications and networking pathways beneath the earth and toward the sky, and we helped put it there.

Our reputation is one of quality job performance. The word is out, and now we have hit the ground running. Join us.

Quality. Appearance. Perfection.
That's On-Side Construction.

A man wearing a blue hard hat and safety glasses, looking directly at the camera with a serious expression. He is in an industrial setting, with metal structures visible in the background. The image has a dark, moody tone.

***“Without labor,
nothing prospers.”***

– Sophocles –

Who We Are

Communications and utilities companies don't have time to waste on contractors who don't come through. *That's why they call On-Side.*

On-call / OSHA Compliant / Quality Work
Every Time

With the right equipment and our skilled team of operators, there's no cable we can't pull or place. No ground we can't get through.

About Us

On-Side Construction has created a new standard in the utility installation space.

We are an **established, valuable, unprecedentedly supportive franchise** opportunity built on the need for reliable, construction professionals who know how to get the job done right.

established, valuable,
unprecedentedly
supportive franchise
