COURSE DESCRIPTION:

The information in this course provides teachers, parents and clinicians with evidence-based solutions for facilitating students' level of participation and attention during challenging tasks, with the goal of improving on-task behaviors. It focuses on using the "A SECRET" clinical framework (Miller, 2006) as a tool by which therapists can enable teachers and parents to recognize the many factors that influence the child's ability to succeed at his/her "occupation" as a student within the classroom, while looking at performance skills, performance patterns, context, activity demands, and client factors.

The course will help provide an understanding of the child's behavior and lack of participation in the school environment by considering not only psychological factors intrinsic to the child, but also the classroom activities that place demands on the child and the context in which these activities are implemented.

This evidence-based course provides an array of "everyday tools" that work well within a clinical framework, A SECRET, and can be easily implemented into a child's educational and family plan. ***This workshop is a must for the school-based therapist, who has limited space to work within, has limited funding and is determined to be an integral part of the school team. In this workshop, you will learn unique and everyday practices when working with children with Sensory Modulation Disorder.***

AGENDA

- 8:30-8:45 Introduction– Sensory diets Vs A SECRET framework
- 8:45-9:00 The everyday "essentials" needed for the school based therapist, a pocket full of tricks
- 9:00-9:30 The challenges our students face on a daily basis exploring modulation disorders. Bialer and Miller
- 9:30-10:00 The Fuel Tank Analogy (Bialer and Miller)
- 10:00-10:45 Introduction to A SECRET FRAMEWORK, uncovering the elements of A SECRET Framework
- 10:45-11:00 Break
- 11:00-12:00 A SECRET BLUEPRINT, exploring effective interventions that address poor student participation in the classroom.
- 12:00-1:00 LUNCH (on your own)
- 1:00 - 2:30 Interactive lab, "let's make adaptive equipment for our students" Participants will fabricate adaptive tools, addressing the elements that underlie A SECRET framework
- 2:30-2:45 Break
- 2:45-3:30 Case Student, Q&A

LEARNING OBJECTIVES: AT THE END OF THIS SEMINAR THE PARTICIPANT WILL BE ABLE TO...

- Participants will identify the underlying foundations, which describe Sensory Processing and Sensory Modulation Disorder.
- Participants will be able to identify principals and intervention guidelines specific to different Modulation Disorders.
- Participants will become acquainted in using an array of "common, everyday items" that can easily be modified and adapted for the student with Modulation Disorder.
- Participants will be able to differentiate between the seven elements of A SECRET, with attention to the evidence behind each
- Participants will identify interventions that support each element of A SECRET
- Participants will appropriately plan and organize strategies by utilizing elements of A SECRET clinical framework that support areas of challenge for students.
