COURSE DESCRIPTION:

Have fun at the course, have fun with your clients! Join us in therapeutic play - the NDT way! This interactive basic level course for OT/COTA's, PT/PTA's and SLP's will **emphasize treatment strategies to promote** "natural ways to play" in the child with neurological involvement. Participants will learn how neuro-motor control and influences of the sensory systems impact functional outcomes. Participants will learn basic components of Integrative Yoga Therapy (IYT) and how these strategies relate to NDT.

Therapists will learn introductory handling techniques to optimize postural control and visual/perceptual skills. Therapists will be challenged to facilitate creative play with the children they work with and gain knowledge in the value and foundation of "play". This course will take you through lecture, handling and movement labs, interactive discussions and problem solving to spark individual creativity and basic understanding of NDT and IYT.
