Southern New Brunswick Forest Products Marketing Board

SNB Marketing Board Average Stumpage Rates

July 1 2026- September 30 2026

NOTE: The average stumpage rates below have been calculated from wood sale stumpage transactions through our Marketing Board from July 1 2026 to September 30 2026. Direct stumpage transactions (mill pays producer) are unknown, and for this purpose, can not be included in the calculations.

Please note: Stumpage rates can be influenced by many factors including, but not limited to: harvest prescription, overall volume, quality, piece size, and cost for woodlot roads, highway weight restrictions and distance to mill to name a few.

Like other markets, stumpage can also be influenced by competition. The higher number of logging contractors that compete for stumpage can also drive prices up. This may not always be the case, as stumpage rates are based on the factors above, but also the delivered price to the mill (which is another market in itself).

Product	Mill	Average Stumpage (Cord)	Average Stumpage (GMT)
Hardwood Pulpwood	Louisiana Pacific Woodland Pulp Arauco	16.54	7.93
Softwood Pulpwood	JDI Sussex JDI South bay	7.98	4.09
