

The next AGM is on Sunday, 28/7/19 at 9.30am in the club auditorium.
All Financial Members welcome.

A proposal will be put forward to do building alterations to the clubs' premises. The Club hasn't had any major refurbishments for many, many years, so any works done would incorporate mandatory upgrades to current fire, health and safety regulations.

The demographics of Currarong have changed with less permanent residents and more holiday makers. We need to attract these people and also our younger generation and families by making the club more family and user friendly with outdoor and children's play areas, hopefully these patrons will become the backbone of the club in the future.

The design plans on display in the club are concept drawings only and are open for input from club members after approval for funding by members at the A.G.M. The club has cash reserves of \$1,450,000.00 currently on hand after liabilities. Approximately \$609,000.00 is needed for building works for Proposal 1A.

This **is not inclusive of**: Council fees and charges, Architectural, Structural and Consultant fees, Outdoor play equipment or Landscaping. Proposal 1B yet to be priced.

Please try to attend the AGM to vote on this important proposal. In the meantime, your thoughts would be appreciated on Facebook or just a Yes or No post so we can get a feel for the members thoughts.

Please note: We need to get approval for funding before any final costings can be done as we need to get engineering, fire and hydraulic consultants etc involved so the extent of the works can be estimated.
