

# Contract Lookbook

# Chilewich brings depth to surfaces.

Established in 2000 by designer Sandy Chilewich and architect Joe Sultan, Chilewich pioneered the use of extruded yarns for woven table coverings and soon expanded into installed flooring and rugs for commercial use. Today the Chilewich Contract collection includes backed and un-backed textiles for floors, walls, windows, and upholstery. Made entirely in the United States, these products combine innovative weaves and a distinctive color palette with extraordinary durability and easy maintenance.

## Tiles and Planks

Modular 18" (45.7 cm) square Tiles or 6" x 36" rectangular Planks (15.2 x 91.4 cm) are made of Chilewich signature woven textiles bonded either to BioFelt®—an innovative felt and vinyl backing system—or to a vinyl backing system. Chilewich has been granted U.S. Patent 7,326,661 for these innovative tiles.

BioFelt® backing is recommended for use in commercial, retail, healthcare, and hospitality environments. Installed with adhesives, BioFelt® offers cushioning underfoot while providing a waterproof layer of protection against stains and spills, making it easier to clean and quicker to dry. The post-consumer recycled content of BioFelt®-backed tiles exceeds 27%.

Vinyl backing is recommended in areas with heavy rolling traffic and for fitness and outdoor applications.

## Wall Textiles

Extraordinarily durable, our Type III Wall Textiles offer designers a way to reimagine vertical surfaces and are unique in their ability to coordinate with Chilewich floor coverings. They are used extensively for healthcare, hospitality, and multi-family properties as well as projects that require more durable and easy-to-maintain wall treatments. For environments with a high level of ambient noise, Wall Textiles are available with our WhisperFelt acoustic backing.

## Rolls

Designed for wall-to-wall use, Rolls are made of Chilewich signature woven textiles bonded either to BioFelt®—an innovative felt and vinyl backing system—or to a vinyl backing system.

BioFelt® backing is recommended for use in commercial, retail, healthcare, and hospitality environments. The post-consumer recycled content of BioFelt®-backed rolls exceeds 27%.

Vinyl backing is recommended in areas with heavy rolling traffic and for fitness and outdoor applications.

## Upholstery Fabric

Chilewich Upholstery Fabric is designed to provide versatility, durability, and ease of maintenance. Used to enhance a broad variety of furnishings and surfaces, these textiles add color and texture through their unique weave construction. Suitable for both indoor and outdoor use.

## Rugs

Suitable for indoor and outdoor use, Rugs are made of Chilewich signature woven textiles bonded to a flexible latex underlayer. This durable, commercial-grade backing helps to protect the floor while providing enhanced slip resistance and increased comfort underfoot.

Rugs are finished with self-bound edges. Made by folding the face fabric over the edge of the mat and sewing it into place, this unique finishing step provides a clean look.

Custom sizes are available in all weaves.

## Window Coverings

Chilewich signature woven textiles are available as roller shades and panel systems. With their shimmering, multi-tonal colors, the collection's distinctive weaves enhance windows in residential and commercial settings.
