SLABHANDLING

Toolsuggest edf orhandling

For handling the enormously sized slabs from FIIXO, we recommend careful handling with the help of four handlers at the same time in case of the largest size and at least two handlers for the smaller sizes of the slabs.

Reinforced trolley

Parallel & transverse guides

Single & Double suction cup

HANDLINGINS TRUC TIONS

FIIXO recommends the use of a kit of devices designed especially for the handling of large-size slabs.

We recommend carrying out the handling job of the slabs with four handlers at the same time.

Ensure proper suction with a vacuum between the device and the slab and use a single device/suction cup for a maximum length of up to 150cms.

To lift the slabs use sucker cups after cleaning the slab and cups with a damp sponge. Make sure the device also has suckers that run along with the guides and adhere to the slab.

To lift the slab use guides from the long sides of the slab and lift/hang it vertically to the handles of the trolley frame. Use appropriate size reinforced trolley for various sizes of slabs.

SLABCU TTING&DRILLING

Toolsuggest edf orcut tinganddr illing

Workbench with aluminum profiles

Cutting unit

Diamond polishing pads

MANU ALCU TTINGINS TRUC TIONS

Lay the slab on a flat surface and preferably on a workbench with aluminum profiles. Make sure the surface is stable for both cutting and drilling.

Make markings on the slab according to the desired cutting and drilling need.

After scoring the length and making the cut, move the slab out of the workbench till the incision line and split from both sides using cutting-off pliers.

Smooth the edges of the length cut with a diamond polishing pad.

SLAB COUNTER TOP CUTTING

Preparation:

Check the straightness of the cutting bench, and its level, and ensure it is free from debris. Check for proper and enough support for the slab and its cutting.

Waterjet Cutting

The cut should begin and go off the slab while cutting 3/4" perimeter from 1/2" and 3/4" slabs using waterjet.

Steps:

- Make a perimeter cut of a minimum of 2 cm. (Only for 12mm and 20mm slab)
- Make the cutting
- Prepare and refine the cutouts
- Make sure of the radius of 3mm for all inner corners

We recommend radiuses of more than 3mm for kitchen countertop cutouts which facilitates firmer countertops.

Important:

- The perimeter cut of the slab releases stress and may be used as a final cut for the final product.
 - The lower pressure of the drill and on the drill is recommended for drilling holes.
- For cutouts begin cutting at an internal point of the cutout and get closer to the perimeter.

Gapbet weencut outs

For multiple cutouts on a countertop, the minimum distance between cutouts whether small or big, and the edge must be kept at least 5cm.

Important

All cut corners must have a minimum radius of 3mm and never should have 90-degree angles.

A radius of 3mm facilitates firmer countertops as shown below:

Unbalanced weights are not strictly not recommended

SLAB LAYING

Tools suggested for laying

3mm & 10mm trowel

Rubber trowel & Spacers

Device for plate's pulling over and Leveling wedges & clips

SLAB LAYING INSTRUCTIONS

Check the laying substrate. Make sure it is clean, mature, and homogeneous with no cracks.

Apply adhesive onto the back of the slab with a 3mm trowel in one direction only.

Apply adhesive onto the floor substrate at the same time while applying on the slab with a 15mm U-notch or 19mm V-notch trowel in the same direction as the slabs.

Position the slab on the adhesive bed with a sucker frame with adjustment of a minimum of 3mm joint.

Tap the slab from the center to the edges with a rubber trowel to expel air. Make sure air is expelled and there is no bubble between the slab and the substrate.

Complete the laying of the slab with a suitable sealant while keeping a 3mm joint through spacers. The special device of pulling over the slabs can be used for easy laying and spacing.

Level the wedges at each linear meter of the slab.

SLAB EDGE POSSIBILITIES

1-1/2" Dupont Bullnose

1-1/2" Pencile Edge

1-1/2" Dupont Square

1-1/2" Revers Bevel

3/4" Dupont Demi

1-1/2" Dupont Step Square

CLEANING & MAINTENANCE

High-quality raw materials, rigorous production parameters, and world-class technology at FIIXO make the exclusive offering nonporous and thus no dust or deposited waste penetrates the surface.

The no-maintenance surfaces require only a damp cloth for cleaning.

Routine and recurring cleaning spotlights the aesthetic features of the surfaces and keeps the surfaces shining.

For cleaning contamination and stains caused by some common food and other material follow the table below:

TYPE OF STAIN	CHEMICAL PRODUCT	EXAMPLE
Grease	Alkaline - Solvent	Detergent
Oil	Solvent	Ammonia, Baking Soda
Ink	Oxidant - Solvent	Alcohol, Liquid Bleach, Nail Paint Remover
Rust	Acid	Hydrochloric Acid, Vinegar, Red Harpic
Lime	Acid	Descaling Reagent, Hydrochloric Acid
Cement	Acid	Hydrochloric Acid
Wine	Alkaline	Ammonia, Liquid Bleach
Coffee	Alkaline - Solvent	Ammonia, Liquid Bleach
Rubber	Solvent	Alcohol, Thinner
Plaster	Acid	Hydrochloric Acid
Candle Wax	Solvent	Alcohol, Thinner
Iodine	Oxidant	Liquid Bleach
Blood	Oxidant	Liquid Bleach
Ice Cream	Alkaline	Liquid Bleach

Note: It is recommended that you do not stain the surface with any liquid as soon as possible.
