

Dall'Inizio JR. DayCamp

Summer 2018

Week 1: "Let's Go Camping"

Campers will begin their Summer DayCamp adventure by getting to know each other and learning our classroom rules. They will learn all about how much fun camping can be and they will learn about the many aspects of camping. Campers will get to sample some food that you might find on a camping trip, they will go on a bear hunt and so much more.

Week 2: "Out of this World"

Campers will research and learn more about outer space. They will have the opportunity to learn all about the moon, the stars, planets and even rockets to get us to outer space. Activities may include creating 3-D Constellations and plotting the daily motion of the Sun.

Week 3: "Let's Go to The Beach"

Campers will explore the beach and all it has to offer. They will learn about sea creatures, sand and sea shells, the waves and so much more. Activities may include playing different games that you typically play at the beach, building sand castles and learning about the boardwalk and all of the fun activities you can experience at the boardwalk.

Week 4: "Taking Care of Our Earth"

Campers will brainstorm and explore ways to preserve Mother Earth. They will learn about the impact that our behavior has on our beloved planet. Activities may include going on a scavenger hunt and several projects showing how we can recycle the simplest daily items.

Week 5: "We Are Bugging Out"

Campers will explore the world of entomology. We will learn about how amazing bugs are and how valuable bugs truly are. Campers will interact with bugs in their natural habitat, learn about bug bodies, and life stages.

Week 6: "Animal Adventures"

Campers will become zoologists for the week! They will explore different groups of animals, learn more about their habitat, and categorize their characteristics. The campers will learn all about our native animals here in Pennsylvania and the rest of the United States.

Week 7: "Dinosaurs Rock"

Campers will explore all of the different types of dinosaurs that roamed this Earth long ago. We will learn about fossils and what archeaology is all about. We will also learn about the different dinosaur bones and who ate meat and who ate plants.

Week 8: "World Travelers"

Campers will learn all about the amazing places we can visit in this wonderful and exciting world we live in. Campers will learn about the different modes of transportation that we use when we travel the world. They will "visit" many countries, learn about the cultures in those countries and we will also check out the landmarks those countries have to offer.

Week 9: "Garden Adventures"

Campers will learn about various plants and flowers during this week. They will venture to the Arboretum to learn more about the flowers and plants. Activities may include creating their own floral arrangement with a local florist.

Week 10: "Mad Science"

Campers will study chemistry this week. They will have the opportunity to create their own experiments as well as conduct teacher initiated experiments. We will most likely get very messy this week as we will have the opportunity to make rockets and such.
