

# Bar and Counter Stool Information

Dimensions listed are approximate and based on industry standard:

## Counter Height Table

A counter table usually stands between 34" and 36" high. A stool with a seat height of 24" to 26" is recommended.

## Bar Height Table

A bar usually stands between 40" and 42" high. A stool with a seat height of 28" to 30" is recommended.

For a bar that stands between 45" and 48" high. A stool with a seat height of 33" to 34" is recommended.

### Important

Table clearance heights can significantly vary depending on several factors such as top thickness and apron design, so it is recommended you test any setup before purchasing. This guide is for research and reference only.
