

WORKFLOW TIMELINE

We value clarity and collaboration.
Here's how we typically work.

1 Understanding your Vision

We take the time to listen, understand what you want to achieve, and talk through your ideas, priorities, and budget.

2 Planning & Review

We go over plans, project details, and scope of work together so everything is clear before construction begins.

3 Design Development

Scheduling, materials, and coordination with trades are organized to keep the project running smoothly from day one.

4 Feedback & Revisions

Work begins with steady progress, careful workmanship, and open communication throughout the build.

5 Final Delivery

We review the finished project with you to make sure everything meets expectations and feels complete.
