species
HYBRID

Parvisepalum

Paph Class

Brachypetalum

species
HYBRID

Pouch thin (with pleats)
Petals wide, dorsal sepal smaller.

Inflorescence very short
Pouch thick, egg-shaped.
Petals wide, leaves mottled.

species
HYBRID

**Barbatum /
Sigmatopetalum**

Sepals striped. Leaves mottled.
Small synsepal. Flowers single.

species
HYBRID

Cochlopetalum

**Petals short, horizontal, and
corkscrew-shaped**
Flowers sequential.

species
HYBRID

Insigne /
Paphiopedilum

Paph Class

species
HYBRID

**Coryopetalum &
Pardalopetalum**

Flowers multi-floral
(3 or more flowers
per inflorescence)

Sepals usually striped.
Petals usually long
and downswept.

Sepals not distinctly striped
(with the exception: *Paph. fairrieanum*),
Petals narrow and leaves plain.
Large synsepal. Flowers single.

No species
HYBRID

BULLDOGS

Petals WIDE and leaves plain
Sepals not distinctly striped.
Large synsepal. Flowers single.
Inflorescence intermediate length.

HYBRID

[Hybrids between Subgenera]
Does not fit in other classes.

Phalaenanth

Phalaenopsis-Type Flowers

[Flowers on a spike]

(includes biggibum, x superbians)

Dendrobium

Spatulata

Antelope-Type Flowers

[Flowers on a spike,
petals twisted upward]

(includes gouldii, discolor, johannis)

Formosae

Formosae [black hairs on stem]

Callista [pendant spike, yellow center]

(Callista includes lindleyi, farmeri, densiflorum, thyrsoflorum)

Nobile

Cattleya-Type Flowers

[Flowers directly on the stem]

(includes nobile, anosmum, loddigesii, parishii)

Latouria

New Guinea Flowers

[Leaves and flowers clustered at top,
flowers waxy & usually nodding]

(includes atroviolaceum, alexandrae, spectabile, johnsoniae)

**Other Sections
& Allied Genera**

(including smilliae, speciosum, insigne, cuthbertsonii, gonzalesii)
