As a dog catcher, Sergey works within the limits of a law whose logic he himself knows to be terrible. Adopted in 2018, this Federal Law [N498](#) is the focal point of my study, the reason that I came to Ryazan. It decrees stray dogs and cats “ownerless” animals and forbids euthanizing them. It mandates instead that such animals be caught, castrated, and released back to the streets, or else kept kenneled at the expense of regional budgets until they die of natural causes.
