

AL-PAR PEAT co.

The One Source...for all your growing needs

FALL 2018

Al-Par Peat Co.

Website: alparonesource.com

October 2018

THANK YOU, from all of us at Al-Par Peat Company for an outstanding 2017-2018 season! Looking back, it was one of our most successful years ever. This attributes to all of the great customers placing their trust in our products and service. Going forward, we have made some significant investments in our company, including a new delivery vehicle and updated equipment for bagging both professional and retail soils.

We are looking forward to helping you grow your business even more. There are new products, aggressive pricing programs, as well as the many years of expertise available to help you succeed in making the 2018-2019 season even better!

CHECK OUT OUR WEBSITE:

WWW.ALPARONESOURCE.COM

There is an abundance of information and updates on options for your growing season, including monthly sale specials and in-stock items.

This Mix Contains: 80% Extra Coarse Grade Professional Peat Moss
20% Coco Crunch Coir, Dolomitic Limestone, Calcitic Limestone
Wetting Agent, Starter Fertilizer w/ Micronutrients

Lambert Soils... At the root of your success since 1928.

LM-1 Germination Mix

LM-1 Germination Mix is a blend of fine-fibered Canadian sphagnum peat moss along with fine vermiculite and perlite to help promote aeration and ideal water holding capacity.

LM-3 All Purpose Mix

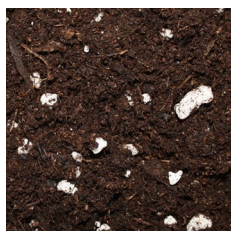

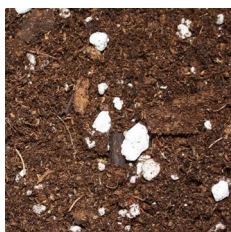

Lambert LM-3 All Purpose Mix is formulated from a blend of coarse Canadian sphagnum peat moss, coarse perlite and medium vermiculite. This substrate is an excellent general or all purpose media. *A Lambert Classic Mix!*

LM-6 High Porosity Mix

Lambert LM-6 High Porosity Mix is a high porosity growing media with long-fibered Canadian sphagnum peat moss including the addition of large peat chunks and coarse perlite. LM-6 is designed for crops that require higher air capacity and drainage.

LM-8 Bark Mix

Lambert LM-8 Bark Mix is a blend of Canadian sphagnum peat moss with aged bark and perlite. This mix is great for use in large containers, perennials, hardy mums and nursery crops. This bark media is ideal for growers who wish to have a media that provides weight for container grown crops that tend to be top-heavy.
