Changing Gears Toward A More *Sustainable* Future

Sustainability Vision

The HC Companies believes that conducting business sustainably is essential for growers and gardeners to thrive in our collective future. To further our partnership with the horticultural industry, HC is committed to becoming the sustainability leader through eco-efficient manufacturing, innovative product development, and responsible resourcing to create sustainable solutions to help improve our world.

Our vision is a concise and clear commitment to truly living and embracing HC's mission and values by doing our part to improve our world for everyone. We have two new evolutionary goals that will set our direction for the future as a company. Those future goals include using zero virgin petroleum-based plastic content in all products, which are fully recyclable or degradable, as well as a 50% reduction in our operational carbon and water footprints.

HC's History of Responsibility

Operating more sustainably has been at the core of HC's manufacturing for many years – consistently and successfully utilizing recycled content in our planters and plant pots. We were one of the first horticultural container suppliers to market with a full line of fiber, molded pulp containers – certified by the USDA Biopreferred® program as being manufactured of 100% Biobased Content. They're also manufactured in a state-of-the-art, closed-loop water recycling facility to help conserve and reuse water.

Additionally, our fiber growing containers use recycled newsprint and fiberboard – much of which is sourced from our own facilities. Always looking for new ways to grow our nearly 100% recycled fiber products, we're expanding into new markets such as protective packaging, whose popularity has soared in the last few years.

We broke new ground by introducing our biobased BioPax® containers – co-developed with our supplier partner – Certified USDA Biopreferred® and made from sustainably sourced wood pulp. BioPax® promotes less waste while offering an optimized end-of-life without compromising on strength and performance.

We guarantee a minimum of 10% PCR (Post-Consumer Recycled) content on average with our renowned line of horticultural containers. By incorporating a minimum of 10% PCR content within the 50% post-industrial recycled material we've been using for many years, we're leading the way for sustainability in our industry. This not only aligns with our dedication to environmental stewardship but also simplifies compliance for businesses operating in regions with stringent plastic-focused regulations.

FREQUENTLY ASKED *Questions*

What are your office hours for Customer Service?

Our Customer Service Team is available from 8:00 AM – 5:00 PM, Monday through Friday Eastern Standard Time. You can call them during regular business hours at 800-225-7712 or send them an email (customersupport@hc-companies.com) and they will return your message as soon as they return to the office.

How can I obtain an actual sample of one of your containers?

To request samples of our horticultural products prior to purchasing, please reach out to a distributor in your area for fulfillment. Find a list of our distributors by visiting hc-companies.com/distributors.

What if containers in my shipment are damaged upon arrival?

Contact our Customer Service Team immediately so we can rectify the situation. Please have your order number ready so they can find your order as quickly as possible to begin the claims process.

Do you offer custom colors for your containers?

We offer a wide array of popular standard colors for the majority of our containers. You'll find what standard colors a container is available in on their individual product pages. If you do not see any options, it's only available in the photographed color. We do have the capability to provide custom colors, but they are based on a minimum quantity order, require additional production time, and would need to be discussed with a sales representative.

Can The HC Companies do custom printing on their containers?

Yes, we can custom print on our round and square greenhouse and nursery containers. Our printing is done in-house directly on your selected containers with various printing processes. We also offer custom design services with your provided branding. Please note that custom printing is not available on all containers (this will be noted on the individual product listings). We also offer adhesive labeling services for SKU numbers and other product information useful at retail.

HOW TO PURCHASE **HC PRODUCTS**

HC's growing containers are sold exclusively throughout North America, utilizing a vast network of horticultural distributors committed to the industry. They not only understand the unique challenges and scheduling limitations growers typically experience but are continually searching for applicable and timely solutions to enable your operation to run smoothly and efficiently.

Our intuitive online filtering system will allow you to find the distributor that's right for your growing operation quickly and easily.

MANUAL AUTOMATED SOLUTIONS

Looking for significant labor savings without purchasing automated equipment?

For Easy Filling...

Lay tray/pot combinations next to each other and pour potting material over the top. Smooth out excess for quick filling.

1

Empty your box of 4.50 Square Quick Lock Pots (SQQ04500) onto a work surface so the bottoms of the pots face the sky. Remove the box.

2

Grab the accompanying tray (TRK15451) with the bottom facing the sky and firmly push against the bottom of the pots until you feel a "snap."

3

Grab the accompanying tray (TRK15451) with the bottom facing the sky and firmly push against the bottom of the pots until you feel a "snap."

CUSTOM LABELING

With HC's adhesive labeling services, we'll design, print, and adhere your supplied UPC barcode and company information directly to the container – saving on labor costs, while decreasing the time it takes to get your product on retailer shelves.

Black

Standard Colors

Colors (besides black) are subject to minimums based on SKU. For Injection, colors (besides black and green) are subject to minimums. Offset printing available on some containers.

IN 2023...

The HC Companies' products were made of more than **50% recycled materials**, and an average greater than **10% was from post-consumer recycled sources.**

ELEVATE YOUR BRAND WITH SQUARE POT PRINTING

- » **Palette of Popular Colors** – Square containers are available in a wide range of popular colors to align with your brand's identity or create striking contrasts that capture attention.
- » **Endless Artistic Possibilities** – With four flat sides, each printed individually, our printed containers offer limitless creative potential. Showcase unique artwork, messages, and imagery on each side.
- » **Local Production, Nationwide Delivery** – Our containers are proudly manufactured and printed in the USA, guaranteeing quality while supporting Made In America. We deliver across North America for your convenience.
- » **Vibrant Four-Color Printing** – Stunning four-color printing on square containers, delivering crisp and precise branding colors that match your standards seamlessly.
- » **Streamlined Branding** – Incorporate UPCs, SKU numbers, and QR codes directly onto the container, eliminating the need for separate labeling and saving you money.
- » **Compatibility Guaranteed** – Our printed growing containers come in a variety of sizes and seamlessly fit with their corresponding trays and flats, ensuring the perfect match.

*With this new innovative square pot printing capability, you can transform your brand's presence with our growing containers today! Stand out, simplify, and leave a lasting impression. **Contact us now!***

NEW! LOW-PROFILE GROWING TRAY

FEATURES

- ✓ Sustainable - uses 30% less material than standard tray
- ✓ Recycled content and recyclable - manufactured from polypropylene which is widely recyclable* versus a standard polystyrene tray
- ✓ Reduced soil waste during filling
- ✓ Pre-assembled at HC to save labor in pot to tray assembly
- ✓ Tag slots are oriented to save time in tagging
- ✓ Ideal for automated labeling systems
- ✓ Excellent reveal for branded pots
- ✓ End handles and side rails make handling up to 4 full trays comfortable; reduces chance of cuts and abrasions from standard trays
- ✓ Pots secured in tray remain upright and supported during transport, reducing mess and plant damage

DID YOU KNOW?

HC containers are made from resin comprised of post-consumer, post-industrial recycled materials?

Plus, we regrind any excess materials for reuse in our manufacturing. There's little to no waste in the process.

HOW TO PURCHASE HC PRODUCTS

Our intuitive online filtering system will allow you to find the distributor that's right for your growing operation quickly and easily.

MANUAL AUTOMATED SOLUTIONS

Looking for significant labor savings without purchasing automated equipment?

For Easy Filling...

Lay tray/pot combinations next to each other and pour potting material over the top. Smooth out excess for quick filling.

1

Empty your box of 4.50 Square Quick Lock Pots (**SQQ04500**) onto a work surface so the bottoms of the pots face the sky. Remove the box.

2

Grab the accompanying tray (**TRK15451**) with the bottom facing the sky and firmly push against the bottom of the pots until you feel a "snap."

3

Grab the accompanying tray (**TRK15451**) with the bottom facing the sky and firmly push against the bottom of the pots until you feel a "snap."

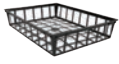

TRAYS, FLATS & SHEETS

Manufactured exclusively from nearly **100% recycled materials**, our trays, flats, and sheets are available in a wide variety of cell configurations and capacities.

They easily de-nest for soil filling and rooting in automated operations

Consistently formed for overall strength and durability

Feature uniform drainage holes

Carefully trimmed for accuracy

ARE YOU SUPPORTING YOUR PLANTS?

Trellis Support Systems

A container trellis is a great way to merchandise vining and crawling plants at retail, while training the plant to grow vertically. They also help prevent vining and crawling plants from entangling during shipping.

Support Rings & Cages

Plants with weighty flowers often utilize plant support rings and cages to help brace delicate stems from falling over and breaking. They also help protect the plant during shipping.

Plant support systems encourage more uniform and healthy growth, ensuring the plant will grow optimally for the duration of the season.

Support systems are virtually undetectable due to their earthy green or black tones, which perfectly coordinate with lower stems and foliage.

Automation Compatible

Look for this icon which identifies nursery containers that are compatible with a variety of automated growing equipment.

AUTOMATION FRIENDLY CONTAINERS

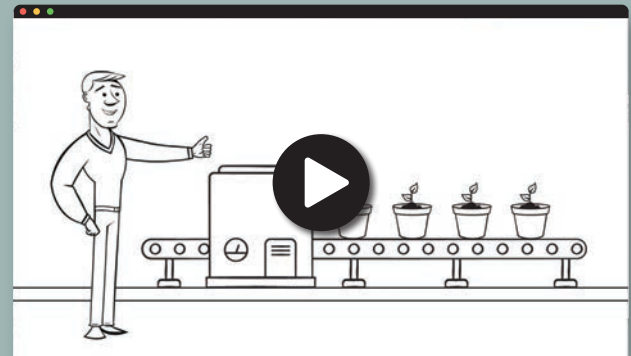

Automated equipment is a popular solution for growers facing increased labor shortages at their operation.

If you are not using an automation compatible container with your new state-of-the-art equipment, you run the risk of internal damage which may not be covered under the manufacturer's warranty.

Here at HC, we have a full line of growing containers that are compatible with a variety of automated growing equipment such as pot dispensers, conveyors, and fork systems to name a few.

Simply look for this icon, or in the product tables under "Special Attributes," for automation compatible containers from HC.

TRAYS, FLATS AND SHEETS

Manufactured exclusively from nearly **100% recycled materials**, our trays, flats, and sheets are available in a wide variety of cell configurations and capacities.

- They easily de-nest for soil filling and rooting in automated operations
- Consistently formed for overall strength and durability
- Feature uniform drainage holes
- Carefully trimmed for accuracy

BRANDED CONTAINERS

NURSERY

THERMOFORM NURSERY CONTAINERS

Durable construction ideal for transporting and automation

Smooth, matte exterior for a high-end appearance

Bottom drainage allows for more efficient irrigation and healthier roots

AUTOMATION FRIENDLY CONTAINERS

If you are not using an automation compatible container with your new state-of-the-art equipment, you run the risk of internal damage which may not be covered under the manufacturer's warranty. HC's branded containers are automation friendly for a variety of equipment.

Ask HC for more details!

BioPax®

- ✓ Designed for reuse and responsible disposal
- ✓ Will break down over time with NO microplastics left behind
- ✓ Non-GMO and non-toxic
- ✓ No harmful PFAS or heavy metals
- ✓ Certified biobased material – not petroleum
- ✓ Great for automation

3.00 Round BioPax® Container

Outside Diameter: 3.00 in / 7.62 cm
 Height: 2.81 in / 7.14 cm
 Maximum Liquid: 7.36 oz / 218 ml
 Quantity Per Case: 560
 Compatibility: TCR12350

4.50 Round BioPax® Container

Outside Diameter: 4.50 in / 11.43 cm
 Height: 5.63 in / 14.30 cm
 Maximum Liquid: 1.38 pt / 655 ml
 Quantity Per Case: 225
 Bulk Quantity: 25,000
 Compatibility: TRS15459, TCG12450, TRS10450

6.00 Round BioPax® Container

Outside Diameter: 6.00 in / 15.24 cm
 Height: 4.25 in / 10.79 cm
 Maximum Liquid: 1.41 qt / 1.33 L
 Quantity Per Case: 116
 Compatibility: TCA06600, TCA06604

A durable growing container that's mindful of the environment

Made from sustainably sourced wood pulp, each BioPax® growing container promotes less waste while offering an optimized end-of-life compared to traditional containers.

What is BioPax® made of?

Sustainably-sourced wood pulp, compounded with modifiers and additives.

Is BioPax® certified?

BioPax® containers are part of the USDA BioPreferred® Program. The USDA Certified Biobased Product label is designed to provide useful information to consumers about the biobased content of the product. The label assures a consumer that the product contains a USDA-verified amount of renewable biological ingredients.

So, is BioPax® plastic?

BioPax® is a resin code #7 (other) and is considered a bioplastic, which is unlike traditional plastic, as it is not derived from petroleum.

What's a bioplastic?

Appearing like traditional petro-plastics, bioplastics are resin-based and produced from renewable sources, like agricultural byproducts and substances. It's important to note that not all resins result in traditional petroleum-based plastic.

What do I do with this pot when I am done using it?

Strong enough for reuse. Do not recycle this pot with other recyclable plastic items. It can be composted in an industrial composting facility with other compostable materials. Or it can go into mixed solid wastes headed for the landfill, where it will degrade naturally over time and will not leave behind any microplastics or harmful chemicals.

So, you're saying BioPax® is biodegradable?

Current ASTM standards (ASTM6400) deem products as "biodegradable" if they break down in less than one year. Due to its wall thickness, the rate of degradation exceeds the one-year threshold, however, current testing/data indicates the product will degrade over an estimated three to five years. The rate could depend on environmental conditions and article shape and thickness; variation of resin/material blends may impact the break down rate as well.

DID YOU KNOW?

HC fiber growing containers are produced using recycled newspaper in our closed-loop manufacturing facility in Canada to eliminate water waste.

They breathe like clay pots, provide the perfect environment for root development and insulation, are automation friendly, contaminant free, durable and in some cases, certified for organic farming.
