

# CAP HALO Top-Riser Ring Kit

---

## What is CAP HALO?

The CAP HALO is an advanced composite top-riser ring kit designed for municipalities to quickly and cost-effectively raise street covers during asphalt overlays, ensuring they stay level with the new pavement.

---

## Key Features

- **Composite Material:**  
Durable, corrosion-resistant, and thermally stable, outlasting traditional metal or polymer risers.
- **Two-Piece Design:**  
Simplifies installation with secure bolting or latching of covers.
- **Sizes Available:**
  - 24" and 30" assemblies
  - Initial 2.25-inch riser (compatible with bolts and paddles)

- **Stackability:**  
design allows for additional overlays without excavation.

---

## Benefits for Municipalities

- **Cost Savings:**  
Substantial savings per cover by avoiding excavation and replacement.
- **Efficiency:**  
Quick installation in minutes reduces labor and equipment needs.
- **Strength:**  
Withstands over 122,000 lbs in load testing, surpassing traditional risers.

---

## Use Cases

- **Asphalt Overlays:**

- Maintains cover level with resurfaced roads.
- **Above-Grade Installations:**  
Adaptable for raised installations as needed.
