VI&E Solutions and Spectrum Associates Sign MOU to Develop Vertiports

VI&E Solutions and Spectrum Associates to create eVTOL infrastructure ecosystem in New England

Neenah, WI – April 23, 2024—Volatus Infrastructure & Energy Solutions and Spectrum Associates Inc., have formally agreed to collaborate on the development of the electric vertical take-off and landing (eVTOL) infrastructure ecosystem, specifically focusing on vertiports in the New England region of the United States. This partnership, outlined in a memorandum of understanding (MOU), entails a two-phase endeavor. The initial phase will see the establishment of seven vertiports spanning across Connecticut, Massachusetts and Rhode Island. Subsequently, the project will expand to encompass a total of 13 vertiports, covering the entirety of the New England area.

“Partnering with an established aerospace engineering manufacturer, such as Spectrum Associates, established in 1957, will be the long pole in the tent for building infrastructure for vertiports and eVTOL charging in Advanced Air Mobility,” said VI&E Solutions Chief Commercial Officer Bob Johnson. “We look forward to complimenting their 75 years of manufacturing in the commercial and military aircraft sector and tee up our collective experience for vertiport networks globally.”

“Spectrum Associates is pleased to be teamed with Volatus Infrastructure & Energy Solutions to develop Advanced Air Mobility infrastructure for this new aerospace transportation technology. The future of eVTOL is nearly limitless,” said Richard Meisenheimer, President of Spectrum Associates, Inc.

Spectrum Associates Inc., headquartered in Milford, CT, is a leading global aerospace engineering and manufacturing company, established in 1957, providing proprietary and patented instruments to the military and commercial marketplace.

Founded in 2021, Volatus Infrastructure & Energy Solutions is connecting communities with best-in-class eVTOL infrastructure technology to ensure society is ready for the future. VI&E Solutions offers three modular vertiport designs and charging stations for electric vehicles across all mediums: air, land and sea. By tailoring to specific customer needs and incorporating the latest technologies, their work positively impacts clients and the communities they serve globally. Join the future with VI&E Solutions.
