## **VI&E Solutions to Collaborate with ResilienX on Wittman Vertiport**

*VI&E Solutions has signed a MOU with ResilienX to work together in Oshkosh, WI*

**Neenah, WI – December 11, 2023**—Volatus Infrastructure & Energy Solutions has signed a Memorandum of Understanding (MOU) with ResilienX to collaborate on their electric vertical take-off and landing (eVTOL) vertiport project at Wittman Regional Airport in Oshkosh, Wisconsin. VI&E Solutions aims to engage ResilienX in providing their FRAIHMWORK® solution as an in-time aviation safety management system (IASMS) capability.

“As a leader in reliable, affordable physical infrastructure for Advanced Air Mobility, we at VI&E Solutions are keen to forge partnerships with leaders in robust digital infrastructure. Ryan and Carter are dedicated professionals who understand that interoperability is absolutely essential. Leveraging the operational expertise of ResilienX will prove invaluable in the long run,” said Dan Sloat, CEO of VI&E Solutions.

“We are thrilled that VI&E Solutions has put their trust in us to monitor the health and performance of this diverse ecosystem. We look forward to working through all of the edge cases which will give regulators and the public around the world confidence in VI&E Solutions’ emerging vertiport network,” said Ryan Pleskach, CEO of ResilienX.

ResilienX is the leader in in-time aviation safety management systems (IASMS) and has developed a platform around fault tolerance, safety assurance and maintenance of complex systems of systems. As vertiports move towards becoming more like an airport and less like a concrete slab, we envision a complex system including battery charging, surveillance, comms, weather sensors, networking equipment, and all of the digital infrastructure needed to manage and direct operations and personnel. ResilienX monitors the health, integrity, and performance of these diverse systems and orchestrates mitigations to gracefully degrade as adverse or off-nominal conditions occur.

Founded in 2021, Volatus Infrastructure & Energy Solutions is connecting communities with best-in-class eVTOL infrastructure technology to ensure society is ready for the future. VI&E Solutions offers three modular vertiport designs and universal charging stations for electric vehicles across all mediums: air, land and sea. By tailoring to specific customer needs and incorporating the latest technologies, their work positively impacts clients and the communities they serve globally. Join the future with VI&E Solutions.
