**Volatus Infrastructure Signs MOU with Ace VTOL**  
*Volatus Infrastructure named preferred infrastructure partner for Ace VTOL*

**Neenah, WI – August 22, 2023**—Volatus Infrastructure, LLC has signed a memorandum of understanding (MOU) with Australian-based electric vertical take-off and landing (eVTOL) company Ace VTOL. The MOU names Volatus as Ace’s preferred infrastructure partner and establishes a joint business development relationship designed to expand opportunities in the rapidly growing eVTOL market.

“Borne out of mutual respect and a shared commitment to accessibility, this partnership brings us even greater credibility among customers in Australia. We commend the visionary leadership of their Founder and CEO, Brett Northey and the whole team at Ace,” said Dan Sloat, Volatus Infrastructure CEO. “Perth is one of the most isolated cities in the world — a full 1,300 miles from the next city of note, so strategically located vertiports will be a key enabler to growth.”

“Ace is incredibly proud to be working hand in hand with the team at Volatus Infrastructure, undoubtedly one of the premier vertiport developers in the global eVTOL market. Volatus Infrastructure offers a unique understanding of the Australian climate and culture with their timeless style and practical vertiport design, offering a comfortable solution for all Australians in this new transport demographic,” added Brett Northey, Ace VTOL Founder and CEO.

Ace VTOL is a game-changing technology and transportation company focused on delivering safe and sustainable eVTOL aircraft to the global market with multirole airframes for commercial, logistics and municipal applications. eVTOL aircraft, or flying taxis as they are commonly known, will serve as a steppingstone to a flying car future, accessible to anyone through the company’s AI and personal flying “Muscle Car” eVTOLs. Ultimately, Ace is committed to alleviating the issues associated with the existing transport ecosystem, increasing property and business valuation through connectivity and safely placing Australia at the leading edge of this exciting new transport demographic.

Founded in 2021, Volatus Infrastructure, LLC is connecting communities to the future with best-in-class eVTOL infrastructure technology to ensure society is ready for the future. Volatus offers three main eVTOL infrastructure designs, a vehicle agnostic charging station, plus an app and maintenance programs. By tailoring to specific needs while incorporating the latest technologies their work positively impacts clients and the communities they serve. Join the future with Volatus Infrastructure.
