Volatus Infrastructure to Support Warbirds of Glory Museum

Volatus Infrastructure helps preserve historical B-25 while ushering in the future of aviation
Neenah, WI – August 22, 2022—Volatus Infrastructure, LLC announced today that it chose the Warbirds of Glory Museum as its first charitable cause to support. The museum is home to the restoration project of a World War II B-25 Mitchell Bomber named Sandbar Mitchell.

“Preserving the history of aviation is just as important as developing the new technology that is taking the aviation industry by storm,” said Grant Fisk, Co-Founder of Volatus. “I appreciate the restoration work they are doing on Sandbar Mitchell and by coaching the next generation of aviation enthusiasts they are ensuring the lifeline of the industry.”

“The Warbirds of Glory Museum is a small museum doing great things in large part due to its many dedicated volunteers and supporters,” said Allen Tucker, Board Chair of the Museum. “We appreciate the vote of confidence from Volatus in what we are doing and look forward to a long partnership.”

Volatus Infrastructure is a member of the Warbirds of Glory Museum. “The membership allows us to stay up-to-date with what the Museum is doing as well as what their current needs are to keep programs running,” said Fisk. Memberships start at just \$35 per year.

Founded in 2013, the Warbirds of Glory Museum was formed to restore and fly period aircraft and offering the unique educational opportunity to understand the Second World War experience while mentoring youth in mechanical skills, aircraft restoration and American values. Over the years the Museum has educated a number of youths in both aircraft restoration and history and is particularly proud that a good number of them have joined the aircraft maintenance industry and remain committed adult volunteers at the Museum.

Founded in 2021, Volatus Infrastructure, LLC is connecting communities to the future with best-in-class eVTOL infrastructure technology to ensure society is ready for the future. Volatus offers three main eVTOL infrastructure designs, a vehicle agnostic charging station, plus an app and maintenance programs. By tailoring to specific needs while incorporating the latest technologies their work positively impacts clients and the communities they serve. Join the future with Volatus Infrastructure.
