## PERMANENT COSMETICS PRE-PROCEDURE INFORMATION

All permanent makeup cosmetic procedures are multi-session processes. You are required to come back for at least one touch-up visit before it can be determined that your work is complete. Touch-up visits are scheduled at 4-6 weeks after initial procedure.

Be prepared for the color intensity of your procedure to be significantly sharper, brighter, or darker than what is expected for the final outcome. It will take time for this transition, based upon how quickly the outer layer of your skin exfoliates.

While these tattooed colors may initially stimulate the exact color and tone desired, they will not always remain a perfect match. Tattooed colors are constant, while your own skin color will vary depending on exposure to cold, heat, sun, and circulatory changes. For example, if you tan your skin and had a scar camouflaged, your surrounding skin will be darker in appearance than the treated area.

1. Since delicate skin or sensitive areas may swell slightly or redden, some clients feel it is best not to make any social plans for a day or two following any procedure. It is always best to avoid these procedures within months prior to important life events, such as weddings. Procedures may take longer than expected to be complete under some circumstances.
2. Bring your day to day makeup with you on the day of the procedure so that your technician can get a good idea of the current color that you enjoy wearing.
3. Any tweezing or waxing should be done at least 48 hours prior to the procedure; electrolysis no less than five days before. Do not resume any method of hair removal for at least two weeks after procedure.
4. Any eyelash or eyebrow tinting or eyelash curling should be done no sooner than 48 hours before, or two weeks after procedure.
5. Do NOT wear contact lenses during or immediately following the eyeliner procedure. Remember to bring your glasses. You may resume wearing contact lenses as soon as your procedure is healed.
6. Following the eyeliner procedure, as a safety precaution, we recommend that you have someone available to accompany you or drive you home.
7. If you are having lip procedures and have a history of any cold sores/fever blisters/herpes simplex, you will be required to contact your physician to obtain a proper prescription to prevent such outbreaks.
8. Refrain from the use of alcohol, Aspirin, Aspirin-containing medicines, ibuprofen, and other blood thinning medications for seven days before and seven days after the procedure. Refrain from judgement altering drugs for at least 24 hours after procedure. No medication should ever be discontinued without first consulting your physician.
9. A skin test is offered upon request.
