	Zoning Change:	<b>\$100</b>	
	desire to request a zo	oning appeal or a zor ing Official.	ning change for the
Signa	ture of applicant		Date

### TYPICAL SITE PLAN

Site plans are required by both the Zoning and the Building Department Regulations. The purpose of a site plan is to provide accurate information for zoning and building officials to make a proper determination of compliance with the codes. The site plan may not only be used for Zoning and Building codes, but also for Subdivision Regulations, Flood Plain Management, Health Department Codes, and Driveway Permit Regulations by the County Engineer, etc. Accurate information of property lines, Right of Ways (ROW), easements, and set backs avoid future litigations and provide detailed information to homeowners as well as future homeowners.

Location of the items below in relationship to an approved well, septic tank and leach field is critical. A change in location of any of the below items which would encroach upon said well, septic and leach field, could result in the disapproval for building on the property. Lack of compliance with the site development plan may result in 1) the Certificate of Occupancy not being issued, 2) voiding the zoning permit, 3) voiding the building permit, or 4) all the above.

The follo	wing information MUST be on the SITE PLAN. (Check if applicable and completed)
	Owner's name and address
2.	Property boundary dimensions, and property acreage
3.	ROW width of road in front (May be obtained from the Fayette County Engineer's office
	at 740-335-1541)
4.	All structures, garages, pole barns, sheds, swimming pool, porches, carports etc. with
	distances from each other and property lines
5.	Building construction line with set back at front, sides and rear
6.	All utility and drainage easements shown on deeds
7.	Location and distances to structures of Septic Tank, Well
8.	Location of driveways and walks
9.	Show appropriate scale for the size of the page of drawing and North arrow
